A Lap Dog Who Doesn't Fit

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The dog is sure he is a lap dog: climbing onto her lap on the couch, backing into her lap on the floor, squeezing into the armchair, half on the beanbag and finally lying on her legs.

TIMELINE

0-5s	Couch attempt
5-10s	Backing into lap
10-15s	Armchair squeeze
15-20s	Beanbag share
20-25s	Settled on legs

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd with a wolf-grey coat of black-tipped hairs, a darker back and dark face mask, lighter cream-grey legs and chest, upright ears, warm brown eyes, wearing a dark red leather collar with a small brass tag. 0-5s (Couch attempt): Living room couch, bright midday daylight. The owner, a woman in her early 30s with dark wavy shoulder-length hair, sits with her legs crossed. The dog climbs up and puts his front half across her lap while his back legs stay on the floor. Sound: couch creaking, owner laughs "you are too big". 5-10s (Backing into lap): Living room floor, daylight, beige carpet. The owner sits cross-legged on the floor. The dog turns around and slowly backs up until he sits right in her lap, completely covering her, his head above hers. Couch cushions and a remote lie on the floor nearby, knocked off earlier, and her face is hidden behind his grey back. Sound: muffled laughter, a grunt, tags jingling. 10-15s (Armchair squeeze): Small blue armchair by the window, daylight. The owner sits in it and the dog climbs in beside her, squeezing into the gap so half of him hangs over the armrest, head resting on her shoulder. Sunlight streams across the chair and a knitted pillow is squished behind them both. Sound: armchair groaning, laughing, owner says "there is no room". 15-20s (Beanbag share): Corner of the living room, afternoon light, a big grey beanbag. The owner lies back in it and the dog climbs on, the beanbag sinking under them, his back legs sliding off onto the floor. A potted plant and a stack of magazines sit beside the beanbag, and his tail sweeps the carpet as he settles in. Sound: beanbag crunching, laughter, a happy huff. 20-25s (Settled on legs): Back on the couch, late afternoon daylight. The owner has her legs stretched out and the dog lies fully across her shins, chin on her knee, eyes closing, looking completely satisfied. Her laptop sits closed on the coffee table, a throw blanket is bunched by the armrest and his tail thumps once against the cushion. Sound: a deep content sigh, owner says "okay, you win".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
