Back to the Park Where We Met

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The owner takes the dog back to the city park where she first met him at an adoption day: walking the leafy path, sniffing the old bench, sitting where the adoption tent stood, a game of fetch and a quiet rest on the bench.

TIMELINE

0-5s	Walking the path
5-10s	Sniffing the bench
10-15s	Where the tent stood
15-20s	Fetch on the lawn
20-25s	Rest on the bench

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd with a wolf-grey coat of black-tipped hairs, a darker back and dark face mask, lighter cream-grey legs and chest, upright ears, warm brown eyes, wearing a dark red leather collar with a small brass tag. 0-5s (Walking the path): Small city park on a cool autumn afternoon, overcast daylight, a paved path lined with half-bare maple trees and fallen yellow leaves. The dog walks ahead on a loose black leash held by the owner, a woman in her early 30s with dark wavy shoulder-length hair, seen only as her arm and hand. He pauses, lifts his nose and sniffs the air, ears up. Sound: leaves crunching, distant traffic, tags jingling. 5-10s (Sniffing the bench): Same park, overcast autumn daylight. An old green wooden bench with peeling paint sits beside the path on patchy grass. The dog sniffs along the bench legs slowly and thoroughly, tail swaying low, then puts his front paws on the seat for a moment before stepping back down. The owner's hand pats the worn wood of the bench beside him. Sound: sniffing, a crow calling, owner says "you remember this?". 10-15s (Where the tent stood): Open grassy corner of the same park near a low brick wall, overcast daylight, scattered leaves on the grass. This is where the adoption tent once stood. The dog sits facing the camera and the owner's hand reaches into frame to scratch his chest. He leans into her hand and blinks calmly, tail sweeping the leaves behind him. Sound: wind in the trees, kids playing far away, owner says softly "this is where I first saw you". 15-20s (Fetch on the lawn): Wide lawn in the same park, cool overcast afternoon, damp grass with a few muddy spots and bare trees in the background. The owner's hand throws a faded orange rubber ball, the dog runs after it in an easy lope, scoops it up, trots back and drops it near her white sneakers, panting with his tongue out. Sound: ball bouncing on wet grass, panting, owner laughing. 20-25s (Rest on the bench): Back at the old green bench in the park, late afternoon, grey daylight starting to fade. The owner sits on the bench, only her jeans and knees in frame, and the dog lies on the path at her feet, then rests his chin on her shoe. Her hand reaches down and strokes his head while a few leaves drift past. Sound: quiet park, leaves rustling, a content sigh from the dog.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Walking the path

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male short-coat grey sable German Shepherd with a wolf-grey coat of black-tipped hairs, a darker back and dark face mask, lighter cream-grey legs and chest, upright ears, warm brown eyes, wearing a dark red leather collar with a small brass tag. Her hand reaches down and strokes his head while a few leaves drift past. Sound: quiet park, leaves rustling, a content sigh from the dog.

FACEBOOK CAPTION

Took him back to the park where I met him at an adoption day.
He sniffed that bench like he remembered too.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
