First Night in Our New Apartment

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Moving day ends with the first night in a new apartment: the dog checks the stacked boxes, inspects the empty bedroom, gets his bed set up first, joins a floor picnic and settles by the window at night.

TIMELINE

0-5s	Checking the boxes
5-10s	The empty bedroom
10-15s	His bed goes first
15-20s	Floor picnic
20-25s	Night at the window

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male short-coat grey sable German Shepherd with a wolf-grey coat of black-tipped hairs, a darker back and dark face mask, lighter cream-grey legs and chest, upright ears, warm brown eyes, wearing a dark red leather collar with a small brass tag. 0-5s (Checking the boxes): New apartment living room at dusk, grey-blue light from a big bare window, light wood floor, stacked cardboard moving boxes and a rolled-up rug. The dog walks slowly between the boxes, sniffing each corner carefully, ears up, then sneezes at a dusty box. Sound: echoing room, cardboard rustling, a sneeze, owner laughs "bless you". 5-10s (The empty bedroom): Empty bedroom in the new apartment, dusk, a single bare ceiling bulb on, white walls and a closet with no doors. The dog steps in, sniffs along the baseboard all the way around the room, then stops in the middle and looks back at the owner standing in the doorway. Sound: claws clicking on bare floor, echo, sniffing. 10-15s (His bed goes first): Living room corner of the new apartment, ordinary ceiling light, boxes in the background. The owner's hands drop his familiar round brown dog bed onto the floor and fluff the edges. The dog steps in right away, turns two circles and lies down, chin on the rim. Sound: bed thumping down, owner says "there, now it is home". 15-20s (Floor picnic): Living room of the new apartment at night, a floor lamp plugged in, the owner and her partner, a man with glasses and short hair, sitting on the floor against boxes eating sandwiches from paper wrappers. The dog lies beside them, then gets a plain dog biscuit from the partner's hand. Sound: paper crinkling, quiet talking, biscuit crunching. 20-25s (Night at the window): Big window in the new apartment at night, ordinary lamp light behind, city lights dotted outside below. The dog stands with his front paws on a low windowsill bench, looking out, ears turning at the sounds. The owner's hand rests on his back and he lies down on the bench with a sigh. Sound: distant traffic, a siren far away, a big sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
