Shorter Walks, Same Love

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Our walks are shorter now but just as happy: leash time at the door, an easy stroll through autumn leaves, a long sniff break, a rest on the grass and a drink back home.

TIMELINE

0-5s	Leash time
5-10s	Autumn stroll
10-15s	Long sniff break
15-20s	Grass rest
20-25s	Home and water

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 12-year-old male short-coat grey sable German Shepherd with a white-grey muzzle and face, grey around the eyes, slightly cloudy eyes, a little thinner and stiffer, moving slowly and carefully but happy, wearing a faded dark red leather collar with a small brass tag. 0-5s (Leash time): Front hallway, mid-morning, daylight from a small window beside the door, coats on hooks and sneakers on a mat. The dog stands wagging as the owner's hand clips a soft padded brown leash to his collar. He takes two eager steps toward the door and looks back at the camera. Sound: leash clip clicking, tags jingling, owner says "ready for our little walk?". 5-10s (Autumn stroll): Quiet suburban sidewalk, cool overcast autumn morning, yellow and brown leaves on the ground, parked cars and small front lawns. The dog walks at an easy, careful pace beside the owner's legs in jeans and sneakers, leash loose, leaves crunching under his paws, tail swaying gently. Sound: leaves crunching, distant car, birds, the dog's steady panting. 10-15s (Long sniff break): Same sidewalk beside a trimmed green hedge and a wooden mailbox post, overcast autumn daylight. The dog stops and pushes his grey nose deep into the hedge, sniffing for a long time, tail wagging slowly. The owner's hand holds the loose leash and simply waits for him. Sound: busy sniffing, rustling leaves, owner says "take your time, buddy". 15-20s (Grass rest): Small neighborhood park, overcast late morning, short grass, a wooden bench and bare trees. The owner sits on the bench and the dog lowers himself carefully onto the grass at her feet, front paws crossed, watching a few pigeons pecking far away with his ears up. Sound: pigeons cooing, wind in the branches, a relaxed sigh from the dog. 20-25s (Home and water): Back in the kitchen at home, late morning window light, beige tile floor. The owner's hand unclips the leash. The dog walks to his water bowl on a rubber mat and drinks, water dripping from his white-grey chin, then lies down on the cool tiles with a happy pant. Sound: leash unclipping, loud lapping, water dripping, a big tired sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Leash time

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
