His New Orthopedic Bed

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

His old joints deserved an upgrade: the delivery box, setting up the new memory foam bed, the careful first sniff, the first circle and the big happy flop.

TIMELINE

0-5s	Box inspection
5-10s	Bed goes down
10-15s	First sniff
15-20s	First circle
20-25s	Big happy flop

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 12-year-old male short-coat grey sable German Shepherd with a white-grey muzzle and face, grey around the eyes, slightly cloudy eyes, a little thinner and stiffer, moving slowly and carefully but happy, wearing a faded dark red leather collar with a small brass tag. 0-5s (Box inspection): Living room, early afternoon, bright overcast daylight from the window, beige carpet and a coffee table. A large plain cardboard delivery box sits on the floor. The dog walks up carefully and sniffs along the edge of the box, ears forward, tail moving in small curious wags. Sound: cardboard creaking, sniffing, owner says "this one is for you". 5-10s (Bed goes down): Same living room, overcast afternoon daylight. The owner, a woman in her early 30s with dark wavy shoulder-length hair, kneels and lays a thick grey memory foam dog bed with a raised cushioned edge onto the carpet next to the sofa, patting the top so it puffs up. The dog watches from a few steps away. Sound: foam whooshing, hands patting the cushion, plastic wrap crinkling. 10-15s (First sniff): Living room by the sofa, soft daylight from the side window. The dog steps closer to the new grey bed and sniffs the raised edge slowly, then the middle, pressing his grey nose into the foam. He looks up at the camera, then back at the bed, tail starting to wag. Sound: slow sniffing, a curious snort, owner whispers "go on, try it". 15-20s (First circle): Living room, overcast afternoon daylight, beige carpet. The dog steps carefully over the low edge of the grey memory foam bed with his front paws, then his back paws, and turns one slow circle, paws sinking a little into the soft cushion as he tests it. Sound: foam squishing softly, tags jingling, owner says "good boy, nice and soft". 20-25s (Big happy flop): Same living room, late afternoon light, the new grey bed by the sofa. The dog lowers himself down onto his side, rests his white-grey head on the raised edge and lets out a long sigh, eyes slowly closing. The owner's hand gives his shoulder a gentle rub. Sound: a long deep sigh, soft snoring starting, owner laughing quietly "best money I ever spent".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Box inspection

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 12-year-old male short-coat grey sable German Shepherd with a white-grey muzzle and face, grey around the eyes, slightly cloudy eyes, a little thinner and stiffer, moving slowly and carefully but happy, wearing a faded dark red leather collar with a small brass tag. Living room, early afternoon, bright overcast daylight from the window, beige carpet and a coffee table. A large plain cardboard delivery box sits on the floor. The dog walks up carefully and sniffs along the edge of the box, ears forward, tail moving in small curious wags. Sound: cardboard creaking, sniffing, owner says "this one is for you".

Clip 2 | 5-10s | Bed goes down

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real 12-year-old male short-coat grey sable German Shepherd with a white-grey muzzle and face, grey around the eyes, slightly cloudy eyes, a little thinner and stiffer, moving slowly and carefully but happy, wearing a faded dark red leather collar with a small brass tag. Same living room, overcast afternoon daylight. Same living room, late afternoon light, the new grey bed by the sofa. The dog lowers himself down onto his side, rests his white-grey head on the raised edge and lets out a long sigh, eyes slowly closing. The owner's hand gives his shoulder a gentle rub. Sound: a long deep sigh, soft snoring starting, owner laughing quietly "best money I ever spent".

FACEBOOK CAPTION

He sighed so loud the neighbors heard it.
Worth every penny for those old hips.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
