His Favorite Spot in the Garden

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Every afternoon he heads to the same shady spot: out the back door, lying in his flattened patch under the maple, sniffing the breeze, watching me water plants and leaning on me.

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 12-year-old male short-coat grey sable German Shepherd with a white-grey muzzle and face, grey around the eyes, slightly cloudy eyes, a little thinner and stiffer, moving slowly and carefully but happy, wearing a faded dark red leather collar with a small brass tag. 0-5s (Out the back door): Back door of a small house, sunny early afternoon, one low concrete step down to a garden with a stone path and flower beds. The dog steps down carefully from the door onto the path and walks toward a big maple tree at the end of the garden, tail swaying. Sound: door creaking, birds, paws on stone, owner says "going to your spot?". 5-10s (His flattened patch): Under a big maple tree at the end of the garden, sunny afternoon with dappled shade, a patch of flattened grass between the roots. The dog circles once on the patch and lowers himself down with a groan, stretching out his front legs. Sound: leaves rustling, a deep groan, birds. 10-15s (Sniffing the breeze): Same maple tree, dappled afternoon shade, purple lavender bushes nearby. The dog lies with his head up, grey nose lifted, nostrils twitching as he sniffs the breeze, ears turning toward the sound of a few bees on the lavender a few meters away. Sound: bees humming softly, wind in the leaves, gentle sniffing. 15-20s (Watching me water): Garden flower bed, sunny afternoon. The owner, a woman in her early 30s with dark wavy shoulder-length hair, waters red geraniums with a green plastic watering can. In the background, the dog lies in his shady spot under the maple, watching her with his chin on his paws. Sound: water trickling, birds, owner says "I see you supervising". 20-25s (Leaning on me): Under the maple tree, late afternoon, warm dappled light through the leaves. The owner sits down on the grass beside the dog. He shifts closer and rests his white-grey head on her knee, eyes half closed, as her hand strokes his back. Sound: leaves rustling, a long contented sigh, owner whispers "best spot in the garden".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
