Best Friends With a Pony

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A day with her shaggy pony friend: a nose-to-nose hello, walking the fence line together, watching grooming, hay time in the barn and a quiet rest by the paddock.

TIMELINE

0-5s	Morning fence hello
5-10s	Walking the fence
10-15s	Watching the grooming
15-20s	Hay time
20-25s	Resting by the paddock

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female long-coat black-and-tan German Shepherd with a black saddle, warm tan legs, chest and face, fluffy longer fur on the ears, neck, chest and tail, gentle eyes, upright ears, wearing a bright yellow collar with a small round tag. 0-5s (Morning fence hello): Small paddock behind a farmhouse, early morning, cool overcast daylight, wooden post-and-rail fence and muddy hoofprints. A small brown Shetland pony with a shaggy blonde mane walks up to the fence. The dog stands on the other side, stretches her neck, and the two touch noses through the rails, both sniffing calmly, the pony's ears pointed forward. Sound: birds, the pony's soft snort, the dog sniffing, owner whispers "there she goes". 5-10s (Walking the fence): Same paddock fence, overcast morning light, wet grass. The dog trots slowly along the outside of the fence while the small brown pony with the blonde mane walks beside her on the inside, matching her pace. Both stop at the corner post at the same moment, and the pony lowers its head to sniff the top of her ears. Sound: hooves on soft ground, collar tags jingling, wet grass swishing. 10-15s (Watching the grooming): Gravel yard beside a small red barn, soft grey daylight. The small brown pony with the blonde mane stands tied to a ring on the barn wall while the owner's hand brushes its side with a stiff brush, little puffs of dust rising. The dog lies a few meters away on the gravel, head on her paws, watching, tail sweeping slowly. Sound: brush strokes, the pony shifting its hooves on gravel, a rooster far off. 15-20s (Hay time): Inside the barn, dusty daylight from the open door, loose straw on the concrete floor. The owner's hands drop a flake of hay into a low rack for the small brown pony with the blonde mane. The dog stands outside the half-open stall door, sniffing the hay smell in the air while the pony pulls at the hay and chews loudly. Sound: hay rustling, loud chewing, the dog sniffing, owner says "breakfast for both of you soon". 20-25s (Resting by the paddock): Paddock fence in late afternoon, warm low sunlight and long shadows on the grass. The dog lies in the grass right against the outside of the fence. On the other side the small brown pony with the blonde mane dozes standing, one back hoof tipped, its muzzle hanging just above her head. Neither moves except for a slow flick of the pony's tail. Sound: crickets starting, a fly buzzing, the pony's slow breathing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Morning fence hello

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult female long-coat black-and-tan German Shepherd with a black saddle, warm tan legs, chest and face, fluffy longer fur on the ears, neck, chest and tail, gentle eyes, upright ears, wearing a bright yellow collar with a small round tag. Small paddock behind a farmhouse, early morning, cool overcast daylight, wooden post-and-rail fence and muddy hoofprints. A small brown Shetland pony with a shaggy blonde mane walks up to the fence. The dog stands on the other side, stretches her neck, and the two touch noses through the rails, both sniffing calmly, the pony's ears pointed forward. Sound: birds, the pony's soft snort, the dog sniffing, owner whispers "there she goes".

Clip 2 | 5-10s | Walking the fence

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult female long-coat black-and-tan German Shepherd with a black saddle, warm tan legs, chest and face, fluffy longer fur on the ears, neck, chest and tail, gentle eyes, upright ears, wearing a bright yellow collar with a small round tag. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
