# Bunny Snuggle Buddy

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

## VIDEO IDEA

A lop-eared rabbit picks her as its favorite pillow: a paw sniff, a full flop beside her, a little grooming session, hay snacks and an afternoon snuggle.

## MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female long-coat black-and-tan German Shepherd with a black saddle, warm tan legs, chest and face, fluffy longer fur on the ears, neck, chest and tail, gentle eyes, upright ears, wearing a bright yellow collar with a small round tag. 0-5s (Paw sniff): Living room, Sunday morning, soft window light, beige rug, a low exercise pen with the gate open. A small grey lop-eared rabbit hops out of a cardboard box hideout. The owner sits on the floor right beside the open gate. The dog lies down outside it, and the rabbit hops over and sniffs her front paw. Sound: soft thumps of rabbit hops, the dog's slow breathing, owner whispers "stay". 5-10s (Bunny flop): Same living room, morning daylight, beige rug. The grey lop rabbit stretches out flat on the rug right next to the dog's chest, back legs kicked out behind it. The dog lies very still, lowers her head and gently sniffs the rabbit's floppy ear, the owner's hand resting on the rug close by. Sound: quiet room, a soft thud as the rabbit flops, owner whispers "that means it's happy". 10-15s (Grooming session): Living room rug, soft morning light, owner's knee in the frame. The grey lop rabbit nudges the dog's front leg with its nose, then starts licking the long fur on her paw in small quick strokes. The dog blinks slowly, stays lying still, and watches it without lifting her head. Sound: tiny licking sounds, a clock ticking, the dog's soft sigh. 15-20s (Hay snack): Living room by the exercise pen, late morning window light, beige rug. The owner's hand sets down a small pile of fresh hay. The grey lop rabbit munches it quickly, little stems sticking out of its mouth. The dog leans in, sniffs the hay, sneezes, and pulls her head back with a surprised blink. Sound: hay crunching, the dog's sneeze, owner laughs "not for you". 20-25s (Afternoon snuggle): Living room, cloudy afternoon, grey light through the window, beige rug. The dog lies on her side, and the grey lop rabbit is pressed against her belly, both dozing. The owner's hand slowly strokes the rabbit's back. The dog's ear twitches once and she lets out a long sleepy breath. Sound: rain starting outside, slow breathing, a quiet house.

## AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

## CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

#### HOW TO MAKE IT LOOK REAL

| | |
|---|---|
| **Use a real photo** | Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips. |
| **Muse AI: one video** | Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts. |
| **Pick the most natural** | Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face. |
| **Keep the real sound** | Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath. |
| **No filters** | Do not add filters, slow motion or fancy transitions - real home videos don't have them. |
