Snow Day Zoomies With My German Shepherd

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

The first snow of the year: careful first steps, full-speed zoomies, face-planting in the snow, snapping at tossed snow, and warming up inside with snow stuck in his fur.

TIMELINE

0-5s	First steps in snow
5-10s	Snow zoomies
10-15s	Face in the snow
15-20s	Snapping at snow
20-25s	Warming up inside

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (First steps in snow): Back door of a house opening onto a yard covered in fresh snow, early morning, white overcast sky, flat cold daylight. The dog steps out onto the porch, puts one front paw into the snow, pulls it back, then sniffs the snow and steps down into it, leaving deep paw prints. Sound: quiet winter morning, crunching snow, owner says "what is it?". 5-10s (Snow zoomies): Snowy backyard, overcast morning light, wooden fence capped with snow, a bare tree in the corner. The dog suddenly bursts into a full-speed run, racing in wide circles around the yard, kicking up clouds of powdery snow, tail tucked low as it turns. Sound: snow crunching fast, heavy breathing, owner laughing. 10-15s (Face in the snow): Same snowy yard, flat white daylight. The dog stops, pushes its whole muzzle deep into the snow and plows forward a little, then lifts its head with snow covering its nose and eyebrows, snorts, and shakes its head. The yard behind it is covered in messy paw tracks. Sound: snorting, snow crunching, owner says "you goofball". 15-20s (Snapping at snow): Same snowy backyard, overcast morning light. The owner's gloved hand scoops a loose handful of snow and tosses it into the air. The dog jumps a little and snaps at the falling snow, then looks around confused, searching the ground for where it went. Sound: jaws snapping, snow crunching, owner laughing. 20-25s (Warming up inside): Inside by the back door, grey winter daylight through a window, a rubber boot tray and an old rug. The dog lies on the rug with small clumps of snow stuck to its legs and chest, slowly melting, and licks the snow off one paw while panting. Sound: licking, panting, quiet house.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First steps in snow

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Back door of a house opening onto a yard covered in fresh snow, early morning, white overcast sky, flat cold daylight. The dog steps out onto the porch, puts one front paw into the snow, pulls it back, then sniffs the snow and steps down into it, leaving deep paw prints. Sound: quiet winter morning, crunching snow, owner says "what is it?".

Clip 2 | 5-10s | Snow zoomies

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
