All of My German Shepherd's Favorite Nap Spots

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

One day of naps around the house: stretched on the couch, in a patch of sun, on the clean laundry, under the desk at my feet, and belly up on the bed.

TIMELINE

0-5s	Couch nap
5-10s	Sunny floor patch
10-15s	Clean laundry
15-20s	Under the desk
20-25s	Belly up nap

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Couch nap): Living room, late morning, soft daylight through sheer curtains, a worn grey couch with a crumpled throw blanket. The dog is stretched across the whole couch with its head on the armrest, eyes closed. It opens one eye at the camera, then closes it again. Sound: quiet house, soft snoring, owner whispering "comfy?". 5-10s (Sunny floor patch): Hallway with a wooden floor, midday, a bright rectangle of sunlight coming through a window onto the boards. The dog lies flat on its side inside the sunny patch, legs stretched out, ribs rising and falling, one ear flicking at a fly. Sound: clock ticking, deep slow breathing. 10-15s (Clean laundry): Bedroom, afternoon, daylight from the window, a plastic laundry basket tipped on the carpet. The dog is curled up on a pile of freshly washed towels and t-shirts that spilled out of the basket, nose tucked under its tail, eyes half open. Sound: quiet room, owner sighing "I just washed those". 15-20s (Under the desk): Small home office, afternoon window light, wooden desk and an office chair. Camera looks down under the desk where the dog lies curled around the owner's feet in grey socks, chin resting on one foot, eyes closed. A charging cable and a crumpled paper bag lie on the carpet beside it. Sound: keyboard typing, a soft snore. 20-25s (Belly up nap): Bedroom, early evening, the last blue daylight from the window, an unmade bed with white sheets. The dog sleeps flat on its back in the middle of the bed, legs folded in the air, mouth slightly open, paws twitching as it dreams. Sound: loud snoring, owner laughing quietly.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Couch nap

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
