New Toy Day for My German Shepherd

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A new toy arrives: sniffing the delivery box, the first squeak, grabbing it and running, a squeaking session on the rug, and falling asleep with it.

TIMELINE

0-5s	Sniffing the box
5-10s	First squeak
10-15s	Grab and run
15-20s	Squeak session
20-25s	Toy nap

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Sniffing the box): Front hallway, morning daylight from a small window by the door, shoes lined up on the floor. A plain brown cardboard box sits on the floor. The dog sniffs all around it, pushing its nose against the corner, tail wagging faster and faster. Sound: sniffing, tail thumping the wall, owner says "what's in there?". 5-10s (First squeak): Same hallway, morning daylight. The owner's hand holds up a plush orange fox toy and squeezes it once. The dog's head tilts to one side, ears straight up, then tilts the other way, eyes locked on the toy. Its front paws shuffle on the floor as if it can barely sit still. Sound: loud squeak, a quiet excited whine. 10-15s (Grab and run): Hallway leading into the living room, morning daylight. The owner lowers the plush fox and the dog grabs it gently in its mouth, then turns and trots off down the hall with its head high and tail wagging, the toy flopping. Sound: claws clicking on the floor, squeaking, owner laughing. 15-20s (Squeak session): Living room, morning light through the window, a faded patterned rug. The dog lies on the rug holding the plush fox between its front paws and chomps on it over and over, squeaking it nonstop, eyes half closed in concentration. Sound: squeak, squeak, squeak, owner groaning "oh no". 20-25s (Toy nap): Same living room rug, afternoon daylight now softer from the window. The dog is asleep on its side with its chin resting on the slightly soggy plush fox, one paw draped over it. Its legs twitch a little as it dreams, and a few toy stuffing threads hang loose from the fox's ear. Sound: quiet house, slow breathing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sniffing the box

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
