My German Shepherd Loves His Kiddie Pool

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A hot summer afternoon in the yard: biting the water from the hose, stepping into the kiddie pool, pawing at the water, lying down in it, and wet zoomies on the grass.

TIMELINE

0-5s	Biting the hose water
5-10s	Stepping in
10-15s	Pawing the water
15-20s	Lying in the pool
20-25s	Wet zoomies

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Biting the hose water): Sunny backyard, hot summer afternoon, bright daylight, dry patchy grass. A hard blue plastic kiddie pool sits on the lawn half full. The owner's hand holds a green garden hose filling it, and the dog bites at the stream of water, getting its face wet. Sound: hose spraying, jaws snapping at water, owner laughing. 5-10s (Stepping in): Same backyard, bright summer sun. The dog steps over the edge of the blue kiddie pool one leg at a time until all four paws are in the shallow water, then stands there looking at the camera with its mouth open, panting. Sound: water sloshing, cicadas, panting. 10-15s (Pawing the water): Same blue kiddie pool, bright afternoon sunlight. The dog digs at the water with one front paw, again and again, splashing water over the edge and onto the grass, then pushes its nose under the surface to look for what it's splashing. Sound: splashing, owner laughing "what are you digging for?". 15-20s (Lying in the pool): Same backyard, hot afternoon sun. The dog lies down in the kiddie pool with the water up to its chest, legs folded under it, panting happily and looking around the yard like it owns the place. Bits of cut grass float on the water around its legs. Sound: water lapping against plastic, cicadas, relaxed panting. 20-25s (Wet zoomies): Same sunny backyard, bright daylight. The dog leaps out of the pool and runs a quick wide circle around the yard, coat soaked and dripping, then drops onto the grass and rolls on its back, legs kicking. Dry grass clippings stick all over its wet coat. Sound: pounding paws, splashing, owner shouting "not in the dirt!".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Biting the hose water

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
