Evening Walk in the Neighborhood With My German Shepherd

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

An autumn evening walk around the block: heading out, sniffing a post, hearing another dog, crunching through fallen leaves, and sitting on the front steps at dusk.

TIMELINE

0-5s	Heading out
5-10s	Sniffing a post
10-15s	Hears another dog
15-20s	Crunchy leaves
20-25s	Front steps

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Heading out): Quiet suburban sidewalk, early evening, fading daylight with a pale pink and grey sky, autumn trees along the street. Owner's point of view looking down, holding a leash. The dog walks beside the owner's sneakers at an easy pace, tail swaying. Sound: tags jingling, footsteps, a distant car. 5-10s (Sniffing a post): Same sidewalk, evening daylight fading, a wooden fence post at the edge of a neighbor's lawn. The dog stops and sniffs the base of the post very thoroughly, nose working, while the leash hangs loose. A few fallen leaves lie in the grass around the post. Sound: sniffing, crickets starting, owner says "okay, let's go". 10-15s (Hears another dog): Same street, dusk light, houses set back from the sidewalk. The dog stops suddenly, ears up, head turned toward a fenced yard across the street where a dog is barking out of sight, then lets out one quiet woof. Its tail lifts and goes still for a moment. Sound: distant barking, one quiet woof, owner says "leave it". 15-20s (Crunchy leaves): Stretch of sidewalk covered in dry brown and orange fallen leaves, evening, last of the daylight. The dog walks right through the thickest pile, pushing its nose into the leaves and sniffing as they crunch under its paws. A few leaves stick to the fur on its legs. Sound: leaves crunching, crickets, owner laughing softly. 20-25s (Front steps): Front steps of a small house, dusk, deep blue sky, the last bit of natural light. The dog sits on the top step next to the owner's knees, panting gently, looking out at the quiet street, then turns and sniffs the camera. Sound: crickets, panting, owner says "good walk".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Heading out

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
