First Real Spring Walk of the Year

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A fresh spring morning walk: heading out on the sidewalk, sniffing tulips in a front yard, a park path with dandelions, a bee distraction, and a drink from a water bottle.

TIMELINE

0-5s	Heading out
5-10s	Sniffing tulips
10-15s	Dandelion field
15-20s	Bee distraction
20-25s	Water break

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Heading out): Quiet residential sidewalk, bright spring morning, soft sunlight with light clouds, cracked concrete, green lawns. The camera is the owner's point of view holding a red leash. The dog walks ahead at a happy trot, tail up, looking back once at the camera. Sound: birds chirping, tags jingling, claws on concrete, a car passing far away. 5-10s (Sniffing tulips): Edge of a neighbor's front yard, morning sunlight, a small bed of red and yellow tulips beside the sidewalk with mulch around them. The dog stops, leans in and sniffs the tulips carefully without stepping into the bed, then moves on to sniff the grass beside it. Sound: sniffing, birds, owner says "no eating the flowers". 10-15s (Dandelion field): Small neighborhood park, mid-morning, mild sunlight, a grassy field full of yellow dandelions and a few white puffballs, a dirt path along the edge. The dog walks through the tall grass, nose down, puffballs breaking apart as it brushes past them. Sound: grass swishing, birds, a breeze, faint kids playing far away. 15-20s (Bee distraction): Same park, sunny morning, close to a patch of clover. The dog freezes and watches a bee buzzing low over the clover, head tilting side to side, ears forward. It takes one careful step closer, then backs away and sneezes. Sound: faint buzzing, a sneeze, owner laughing "leave it". 20-25s (Water break): Park bench by the path, late morning light, dappled shade from a tree. The owner's hand holds a plastic water bottle and pours a small stream into a collapsible blue silicone bowl on the ground. The dog laps it up, water dripping from its chin, then looks up panting. Sound: water pouring, lapping, panting, birds.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Heading out

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
