My Very Helpful Grocery Inspector

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Unloading groceries at home: the dog meets the car in the driveway, sniffs the bags, follows the owner into the kitchen, inspects the bags on the floor, and gets a carrot.

TIMELINE

0-5s	Meeting the car
5-10s	Sniffing the bags
10-15s	Following inside
15-20s	Bag inspection
20-25s	Carrot payment

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Meeting the car): Driveway in front of a house, late morning, overcast daylight, cracked concrete, an open car trunk with paper grocery bags inside. The dog trots out from the open front door, tail wagging hard, and stands by the back of the car looking up at the bags. Sound: car door closing, tags jingling, owner says "hi, hi, I know". 5-10s (Sniffing the bags): Same driveway, cloudy daylight. The camera points down at two paper grocery bags set on the ground beside the car. The dog pushes its nose into the top of one bag, sniffing loudly, tail wagging, while the owner's hand gently moves its head away. Sound: paper crinkling, loud sniffing, owner says "nope, not yours". 10-15s (Following inside): Front hallway, daylight from the open door, wooden floor, shoes by the wall. The camera is the owner's point of view carrying a grocery bag. The dog walks right beside the owner's legs, staying close and looking up at the bag the whole way to the kitchen. Sound: footsteps, claws clicking on wood, paper bag rustling. 15-20s (Bag inspection): Kitchen, window daylight, beige tile floor, three paper bags lined up on the floor against the cabinets. The dog walks slowly along the row of bags, sniffing each one from top to bottom, then sits down beside the last bag and stares at the camera. Sound: sniffing, fridge humming, paper rustling, owner laughing. 20-25s (Carrot payment): Same kitchen, daylight from the window over the sink. The owner's hand holds out a whole raw carrot. The dog takes it gently, carries it a few steps away, lies down on the tile and starts crunching it, holding it between its paws. Sound: loud carrot crunching, owner says "payment for your help".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Meeting the car

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
