The Kitchen Stare Is Real

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

Dinner prep in the kitchen: the dog watches the cutting board, sits perfectly, rests its chin on the counter edge, follows the owner to the fridge, and finally gets a piece of apple.

TIMELINE

0-5s	Watching the board
5-10s	Perfect sit
10-15s	Chin on the counter
15-20s	Fridge follow
20-25s	Apple reward

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Watching the board): Small kitchen, early evening, last daylight from a window over the sink, beige tile floor, wooden cutting board on the counter. The owner's hands slice a red apple. The dog sits on the floor beside the counter, eyes locked on the board, nose twitching. Sound: knife tapping the board, sniffing, a faint whine. 5-10s (Perfect sit): Same kitchen, evening window light. The camera points down at the dog, who sits very straight on the tile, ears forward, staring up at the camera without blinking. Its front paws shift slightly and a little drool hangs from its lips. Sound: quiet kitchen, fridge humming, owner says "you are not subtle". 10-15s (Chin on the counter): Kitchen counter edge, evening light, laminate countertop. The dog stands and gently rests its chin on the edge of the counter next to the cutting board, keeping its paws on the floor, eyes moving between the apple and the camera. Sound: soft huff, owner laughing "chin off, buddy". 15-20s (Fridge follow): Kitchen, evening, light from the window and the open fridge. The camera follows the owner's point of view walking to the fridge. The dog follows right behind, then pushes its nose toward the open fridge door and sniffs the cold air. Sound: fridge door opening, claws on tile, sniffing. 20-25s (Apple reward): Kitchen, evening light, beige tile floor. The owner's fingers hold a small slice of apple with no core or seeds. The dog sits instantly, takes it gently, crunches it and licks its lips, then stares up again hoping for more. Sound: crunching, lip licking, owner says "okay, that is the last one".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Watching the board

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
