Solving the Treat Puzzle

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

An evening brain game in the living room: the dog sniffs a new treat puzzle, paws at it, nudges a lid open with its nose, eats the treat and proudly finishes.

TIMELINE

0-5s	First sniff
5-10s	Pawing at it
10-15s	Nose nudge
15-20s	Gets the treat
20-25s	Proud finish

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (First sniff): Living room floor in the evening, warm ceiling light, light grey carpet, the bottom of a couch in the background. A flat blue plastic dog puzzle board with small sliding lids lies on the floor. The dog lowers its head and sniffs all over it, ears forward, tail slowly wagging. Sound: loud sniffing, TV murmuring in another room, owner says "find it". 5-10s (Pawing at it): Same living room carpet, warm evening indoor light. The dog lifts one front paw and scratches at the blue puzzle board, which scoots a little across the carpet. The dog follows it with its nose, head tilted, staring at it and sniffing the edges again. Sound: paw scraping plastic, the board sliding, owner chuckles. 10-15s (Nose nudge): Same spot on the grey carpet, evening light from a ceiling lamp. Close up of the dog's black nose pushing against one small lid on the puzzle board until it slides open, revealing a small brown treat sitting in the slot underneath. The dog's ears perk up. Sound: plastic clicking, sniffing, owner whispers "there you go". 15-20s (Gets the treat): Same living room carpet, warm evening light, a slipper visible at the edge of the frame. The dog quickly licks the treat out of the open slot and crunches it, then immediately moves its nose to the next lid and starts sniffing, tail wagging faster. Sound: crunching, sniffing, tags clinking on the plastic. 20-25s (Proud finish): Living room in the evening, warm lamp light, the blue puzzle board with all its lids open lying on the grey carpet. The dog sits up beside it, looks straight at the camera, licks its lips, and gives one short happy bark with its tail sweeping the carpet. Sound: one bark, owner says "genius dog" and laughs.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
