Evening Fetch in the Field

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

An evening in an open field: the dog jumps out of the car, chases a thrown ball, catches it on the bounce, refuses to give it back and walks back as the light fades.

TIMELINE

0-5s	Out of the car
5-10s	Long throw
10-15s	Catching the bounce
15-20s	Won't let go
20-25s	Walk back at dusk

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Out of the car): Dirt parking area next to a big open field, early evening, soft fading daylight, tall grass at the edges. The back hatch of a dusty car is open and the dog jumps down onto the dirt, shakes off its coat and spins around toward the field, tail wagging. Sound: paws hitting dirt, tags jingling, excited whine. 5-10s (Long throw): Wide mowed field, early evening, soft orange-grey sky, a tree line far away. The owner's arm throws an orange rubber ball with a plastic ball launcher. The dog sprints away across the short grass after it, ears back, kicking up bits of grass. Sound: launcher whoosh, fast paws on grass, owner says "go get it!". 10-15s (Catching the bounce): Same open field, evening light getting dimmer, long shadows on the grass. The orange ball bounces once on the grass and the dog lunges and snatches it in its mouth, then turns around and runs straight back toward the camera. Sound: ball thud, paws thumping, heavy breathing. 15-20s (Won't let go): Same field at dusk, soft fading light, grass turning grey-green. The dog stands in front of the owner's sneakers holding the ball, then backs away playfully with its front end down and tail high whenever the owner's hand reaches for it. Sound: owner says "drop it... drop it", a playful growl, crickets starting. 20-25s (Walk back at dusk): Mowed path through the field back toward the parking area, dusk, the sky dim blue-grey, the grass darkening around them. The dog walks ahead slowly with the orange ball in its mouth, tongue out, turning to look back at the camera every few steps. Sound: crickets, slow footsteps on grass, tired panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Out of the car

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
