Chasing Bubbles

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A sunny afternoon with dog-safe bubbles: his first confused look, snapping at them, chasing them across the yard, smacking his lips at the taste and a happy back roll in the grass.

TIMELINE

0-5s	First bubbles
5-10s	Snapping at bubbles
10-15s	Chasing across the yard
15-20s	Smacking his lips
20-25s	Happy back roll

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (First bubbles): Small backyard, sunny afternoon, short green grass, white vinyl fence, a plastic kids' slide in the corner. A few dog-safe soap bubbles float in front of the camera from the owner's bubble wand. The dog stands still with its head tilted, watching one bubble drift slowly past its nose. Sound: birds, a kid laughing next door, owner says "what's that?". 5-10s (Snapping at bubbles): Same sunny backyard, short green grass, white vinyl fence. A stream of soap bubbles drifts low over the lawn. The dog jumps up and snaps its jaws at one bubble, it pops right on its nose, and the dog blinks and shakes its head, then snaps at the next one. Sound: jaws snapping, tags jingling, owner laughing. 10-15s (Chasing across the yard): Sunny backyard, afternoon shadows from the white fence across the grass. The bubbles float toward the fence and the dog runs after them, snapping in the air, turning in a quick circle to catch one more, its ears flopping as it runs. Sound: paws thumping on grass, panting, jaws snapping. 15-20s (Smacking his lips): Close to the camera on the grass, sunny afternoon, white fence behind. The dog sits panting and smacks its lips over and over from the soapy taste, tongue flicking out, a tiny bubble still stuck to the fur on top of its head. Sound: lip smacking, panting, owner giggling "not so tasty, huh". 20-25s (Happy back roll): Same backyard, sunny late afternoon, long shadows on the grass. The dog lies on its back in the grass, wiggling side to side to scratch its back with its legs in the air, then rolls onto its belly, panting and staring at the bubble wand in the owner's hand. Sound: grass rustling, happy grunts, panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First bubbles

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
