Chasing His Own Tail

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A rainy afternoon with no walk turns into a tail chase: he spots the tail, spins, stops dizzy, finally catches it and then collapses on the rug.

TIMELINE

0-5s	Spotting the tail
5-10s	Spinning circles
10-15s	Dizzy pause
15-20s	Caught it
20-25s	Collapse

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Spotting the tail): Living room, rainy afternoon, grey light through the window, hardwood floor, a worn blue rug, a sofa with a throw blanket. The dog stands on the rug, turns its head and stares at the tip of its own wagging tail, ears pricked forward, body frozen for a second. Sound: rain tapping on the window, owner whispering "oh no, here we go". 5-10s (Spinning circles): Same living room, grey rainy daylight, worn blue rug on the hardwood floor, a coffee table nearby. The dog suddenly spins in tight circles on the rug trying to grab its tail, the rug bunching up under its paws as it turns around and around. Sound: claws scrabbling on the floor, rug sliding, owner laughing. 10-15s (Dizzy pause): Living room, grey rainy daylight, the blue rug now crooked on the hardwood floor. The dog stops spinning and stands with its legs spread wide, panting, wobbles a little, then looks around the room before glancing up at the camera. Sound: heavy panting, rain on the window, owner says "you okay?". 15-20s (Caught it): Living room rug, grey window light, sofa in the background. The dog spins once more, finally catches the tip of its tail in its mouth and stands still in a curled C shape holding it, eyes looking up toward the owner, tail tip between its teeth. Sound: claws on the floor, a muffled growl, owner cheering "you got it!". 20-25s (Collapse): Living room, grey window light, rain streaks running down the glass. The dog lets go of its tail and flops down on the rug on its side, tongue out, panting, its tail thumping on the floor as the owner laughs. Sound: thump of the dog lying down, tail thumping, rain, panting.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Spotting the tail

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
