Squeaky Toy Concert

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A new squeaky duck on a Sunday morning: the first sniff, the first squeak, nonstop chomping, tossing it around and bringing it to the couch for one more round.

TIMELINE

0-5s	New toy
5-10s	First squeak
10-15s	Nonstop squeaking
15-20s	Toss and pounce
20-25s	Bringing it to mom

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (New toy): Family room, bright Sunday morning daylight through sliding glass doors, beige carpet, grey sectional couch. The owner's hand drops a new plush yellow duck toy on the carpet and the dog pounces on it right away, sniffing it all over with its tail wagging. Sound: soft thud of the toy, sniffing, owner says "look what I got you". 5-10s (First squeak): Same family room, morning daylight through the glass doors, beige carpet. The dog lies down with the yellow duck between its front paws and bites down, the toy squeaks loudly, the dog freezes with its ears up for a second, then bites again. Sound: loud squeak, a pause, another squeak, owner laughing. 10-15s (Nonstop squeaking): Family room carpet, morning daylight. The dog lies on its belly chomping the yellow duck over and over, making it squeak every second, tail sweeping the carpet behind it, eyes looking at the camera while it chews. A few tufts of yellow fluff are already on the carpet. Sound: squeak, squeak, squeak, squeak, owner groaning "oh my gosh". 15-20s (Toss and pounce): Family room, morning daylight, beige carpet, grey couch behind. The dog stands and shakes the duck hard side to side, tosses it a short way across the carpet, then pounces on it with its front paws and squeaks it again. Sound: toy flapping, squeaks, paws thumping on carpet. 20-25s (Bringing it to mom): Grey sectional couch, morning daylight, the owner's legs in grey sweatpants on the couch. The dog walks up and drops the wet yellow duck on the owner's lap, then sits on the carpet staring up, tail sweeping back and forth, waiting for a throw. Sound: soft plop of the toy, panting, owner sighs "one more time".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | New toy

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
