The Cardboard Box Destroyer

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

An empty delivery box meets its end: careful sniff, first rip, head stuck inside pushing it around, shredding it to pieces and sitting proudly in the mess.

TIMELINE

0-5s	Box inspection
5-10s	First rip
10-15s	Head in the box
15-20s	Shredding time
20-25s	Proud in the mess

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Box inspection): Front entryway, late afternoon daylight from a small window in the door, grey tile floor, shoes lined up by a doormat. An empty plain brown cardboard box sits open on the floor. The dog walks up and sniffs the open flaps carefully, its tail wagging slowly. Sound: sniffing, tags jingling, owner says "don't even think about it". 5-10s (First rip): Living room, light wood laminate floor, late afternoon window light, a brown couch in the background. The dog holds the empty box down with one front paw and bites a flap, pulling back and tearing off a big piece of cardboard. Sound: cardboard ripping, a playful growl. 10-15s (Head in the box): Same living room, late afternoon light, laminate floor. The dog pushes its whole head inside the box and walks forward, sliding the box across the floor until it bumps the couch, then pulls its head out and shakes it. Its tail wags the whole time the box is moving. Sound: box scraping on the floor, a soft bump, owner laughing. 15-20s (Shredding time): Living room floor, late afternoon daylight, torn cardboard pieces all around. The dog lies down in the middle of the scraps, holding a strip of cardboard between its front paws and tearing it with its teeth, little bits stuck to its chin. Sound: tearing, chewing, paper bits rustling. 20-25s (Proud in the mess): Living room, last of the afternoon daylight. The camera shows the floor covered in shredded cardboard. The dog sits in the middle of the mess, panting, tail sweeping pieces aside, looking up at the camera while the owner's hand starts picking up scraps. Sound: panting, cardboard rustling, owner sighs "every single time".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Box inspection

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

Spent $80 on dog toys this month.
His favorite is still the box they came in.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
