A Slow Day With My Senior Dog

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

A quiet day with a 12-year-old shepherd: a slow wake-up, a short gentle walk, a long sniff on the lawn, a soft brushing on the porch and an afternoon nap in a sun patch.

TIMELINE

0-5s	Slow wake-up
5-10s	Short gentle walk
10-15s	Long sniff
15-20s	Soft brushing
20-25s	Sun patch nap

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 12-year-old male German Shepherd with a black saddle, tan legs and face, a grey muzzle and grey around the eyes, slightly cloudy eyes, a little thinner coat, moving slowly, wearing a worn brown leather collar with a small metal tag. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Slow wake-up): Living room, quiet morning, soft overcast light through the window, a thick cushioned dog bed on the carpet. The dog slowly lifts its grey muzzle, stretches its front legs and carefully gets up, back legs a little stiff, giving a slow tail wag toward the camera. Sound: quiet room, a soft groan, owner says "morning, old man". 5-10s (Short gentle walk): Quiet tree-lined sidewalk, mild late morning, overcast daylight, a few fallen leaves. The dog walks slowly beside the owner's legs on a loose leash, stopping often, ears relaxed, the owner matching its slow pace. Its tail hangs low and swings gently with each step. Sound: slow paw steps, birds, leaves rustling. 10-15s (Long sniff): Front lawn of the house, overcast late morning, patchy grass with clover. The dog stands still with its nose down, sniffing one patch of clover for a long time, tail swaying slowly behind it. The owner waits patiently, the leash slack in the frame. Sound: sniffing, a neighbor's wind chime, owner says "take your time". 15-20s (Soft brushing): Back porch, afternoon daylight, worn wooden boards. The dog lies on an old plaid blanket while the owner's hand gently runs a soft brush along its back, a little loose fur coming off, the dog's eyes half closed. Its ears relax back against its head. Sound: soft brushing, birds, a relaxed sigh. 20-25s (Sun patch nap): Living room, late afternoon, a warm patch of sunlight on the carpet by the window. The dog sleeps in the sun patch with its grey muzzle resting on its paws, breathing slowly, while the owner's hand rests softly on its side. Sound: slow breathing, quiet room, a clock ticking.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Slow wake-up

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
