A Full Day in His Life (Morning to Night)

25 seconds | 5 activities | Real phone-video look | 9:16 Reel

VIDEO IDEA

One whole day from wake-up to bedtime: the morning stretch, a walk in the park, a midday nap on the couch, fetch at dusk and curling up at the foot of the bed at night.

TIMELINE

0-5s	Morning stretch
5-10s	Park walk
10-15s	Midday nap
15-20s	Fetch at dusk
20-25s	Bedtime

FULL 25-SECOND PROMPT (only if your tool can make 25s in one go)

A 25-second shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. It shows 5 short everyday moments joined with simple hard cuts. 0-5s (Morning stretch): Bedroom, early morning, pale blue daylight at the window. The dog gets up from its bed on the carpet, stretches long with its front legs out and rear in the air, then gives a big squeaky yawn and shakes its collar. Sound: squeaky yawn, tags rattling, owner mumbling "good morning". 5-10s (Park walk): Park path, cool sunny morning, dew on the grass, a few wooden benches and tall trees. The dog trots ahead on a red leash with its tail up, sniffing along the edges of the grass beside the path. The leash bounces with each step. Sound: birds, footsteps on the path, a jogger passing far away. 10-15s (Midday nap): Living room, bright midday daylight through the window, a grey couch. The dog sleeps on its back on the couch with its legs in the air, paws twitching a little as it dreams. Its lips flap slightly with each breath and one ear is flipped inside out. Sound: soft snoring, owner whispering "he's out". 15-20s (Fetch at dusk): Backyard at dusk, fading blue evening daylight, uneven grass, a wooden fence. The owner's hand throws a worn green tennis ball and the dog runs after it across the dim grass, grabs it and trots back toward the camera. The neighbor's trees are dark shapes behind the fence. Sound: crickets, paws on grass, panting, owner says "last one". 20-25s (Bedtime): Bedroom at night, only faint blue moonlight through the curtains, a dark blanket on the owner's bed. The dog climbs onto the foot of the bed, circles once, curls up with a sigh and closes its eyes. The owner's feet under the blanket move to make room. Sound: mattress creaking, a long sigh, owner whispering "night, buddy".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (recommended)

Make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Morning stretch

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Make 5 short clips	Generate each clip (5 seconds) separately with its own prompt, then join them in CapCut with simple hard cuts. If your tool can make 25 seconds at once, use the full 25s prompt instead.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
