Why I Love My German Shepherd

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A short love letter to him in 5 everyday moments: his welcome at the door, a windy field walk, sitting patiently beside me, his head in my lap and falling asleep on my feet.

TIMELINE

0-5s	Welcome at the door
5-10s	Wind in his fur
10-15s	Patient beside me
15-20s	Head in my lap
20-25s	Asleep on my feet

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (Welcome at the door): Front hallway of a small house, late afternoon, soft daylight from a narrow side window, shoes and a backpack by the door. The owner steps inside and the dog trots up with his fluffy tail swinging wide, pushes his head into the owner's hands and wiggles his whole body, giving one soft happy whine. Sound: door closing, tags jingling, soft whine, owner says "hi buddy, I missed you too". 5-10s (Wind in his fur): Open grassy field at the edge of town, breezy overcast afternoon, flat grey sky and a line of bare trees far behind. The dog walks a step ahead of the owner on a loose leash, and the wind lifts the long fur on his neck and tail. He turns his head back to check on the owner, then keeps walking. Sound: wind rushing past the phone, grass swishing, distant crows. 10-15s (Patient beside me): Front steps of the house, overcast daylight, worn concrete steps and a potted plant. The owner sits down to tie a sneaker, and the dog sits right beside him, pressed against his shoulder, calmly watching the quiet street with ears up. His fluffy chest fur moves a little in the breeze while he waits without moving. Sound: shoelace tugging, a car passing far away, the dog breathing calmly. 15-20s (Head in my lap): Living room in the evening, warm ordinary table lamp light, grey sofa with a rumpled throw blanket. The owner sits on the sofa and the dog walks over, rests his whole head on the owner's lap and looks up. The owner's hand strokes the thick fur behind his ears and his eyes slowly half close. Sound: quiet TV murmur in the background, a long contented dog sigh. 20-25s (Asleep on my feet): Bedroom at night, dim bedside lamp, beige carpet and a pair of slippers. The camera points down at the owner's bare feet on the carpet. The dog is lying across them, fluffy side rising and falling, one ear twitching. He lifts his head, glances up at the camera, then lays it back down with a sleepy groan. Sound: soft breathing, a sleepy groan, owner whispers "that's why".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Welcome at the door

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
