Reading in the Hammock Together

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A lazy summer afternoon: I read in the backyard hammock while he settles on the grass below, checks on me, nudges the hammock and falls asleep in the shade.

TIMELINE

0-5s	Settling below
5-10s	Chin on the edge
10-15s	View from the hammock
15-20s	Gentle nudge
20-25s	Asleep in the shade

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (Settling below): Backyard on a warm afternoon, dappled sunlight through two maple trees, a striped fabric hammock hanging between them and patchy grass. The owner lies in the hammock holding a paperback, and the dog lies down on the grass beside it, stretching out in the shade. Sound: leaves rustling, birds, a page turning. 5-10s (Chin on the edge): Same backyard, dappled afternoon light. The dog stands up beside the hammock and rests his chin on the fabric edge next to the owner's arm, all four paws on the grass. The owner sets the book on her chest and scratches behind his fluffy ears. Sound: hammock ropes creaking softly, owner says "hi, are you checking on me?". 10-15s (View from the hammock): Point of view looking down over the side of the hammock, warm afternoon light and shade. The dog lies on the grass below beside the hammock, a light breeze moving the long fur on his neck and tail. He rolls onto his back for a moment, then flops back onto his side. Sound: breeze, a lawnmower far away, grass rustling. 15-20s (Gentle nudge): Backyard, sunny afternoon, dappled light. The dog stands beside the hammock and pushes the fabric gently with his nose, making the hammock sway a little. He watches it move, tail wagging slowly, then steps back and lies down on the grass beside it, clear of the hammock. Sound: ropes creaking, owner laughing "thanks for the push". 20-25s (Asleep in the shade): Backyard in late afternoon, soft light through the leaves. The dog is fast asleep on his side on the cool grass next to the hammock, fluffy chest rising and falling, one back paw twitching. The owner's hand dangles down and rests on his side. Sound: birds, slow breathing, a page turning.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
