He Learned to Open His Own Toy Box

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The dog learns to pull a rope tied to the drawer of his toy box: first sniff, first tug, digging out a toy, playing with it, then opening it all by himself in the evening.

TIMELINE

0-5s	Sniffing the rope
5-10s	First tug
10-15s	Digging out a toy
15-20s	Squeaky victory
20-25s	Doing it alone

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (Sniffing the rope): Living room, afternoon daylight from a side window, grey carpet with a few toys scattered around. A low wooden toy box with one wide drawer sits against the wall, a thick knotted cotton rope tied to its handle. The owner's hand wiggles the rope and the dog walks over, sniffs it carefully, ears forward, fluffy tail swaying. Sound: quiet room, rope rustling on carpet, owner says "what's this?". 5-10s (First tug): Same living room, afternoon window light. The dog takes the knotted rope in his mouth and gives a short backward tug. The wooden drawer slides open a few inches with a scrape, he lets go in surprise and looks at the camera, then at the drawer, head tilted slightly, long ear fur moving. Sound: wooden drawer scraping, a surprised snort, owner gasps "you did it!". 10-15s (Digging out a toy): Living room, afternoon daylight, grey carpet. The drawer is now fully open, full of worn plush toys and rubber balls. The dog pushes his whole head inside, rummages with his nose and pulls out a faded plush squirrel by its tail, his fluffy tail wagging hard behind him. Sound: toys rustling, a muffled squeak, collar tag clinking on the wood. 15-20s (Squeaky victory): Living room, afternoon light across the carpet near the couch. The dog lies down on a worn beige rug with the plush squirrel between his front paws and squeaks it over and over, chewing gently, looking up at the owner's feet now and then with his ears up. Sound: repeated squeaking, soft chewing, owner laughing quietly. 20-25s (Doing it alone): Same living room in the evening, ordinary ceiling lamp and a floor lamp on, curtains closed. The dog walks to the toy box by himself, grabs the rope and pulls the drawer open in one smooth tug, then picks out a red rubber ball and trots toward the camera with it. Sound: drawer sliding, claws on carpet, owner says "okay, now you're a genius".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Sniffing the rope

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. Living room, afternoon daylight from a side window, grey carpet with a few toys scattered around. Sound: drawer sliding, claws on carpet, owner says "okay, now you're a genius".

FACEBOOK CAPTION

Taught him to open his toy box. Big mistake.
He now does it at 6am every day.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
