Our First Paddleboard Ride Together

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A calm morning on the lake: putting on his life vest, stepping onto the board, sitting at the front while the owner paddles, relaxing on the board and hopping off at the shore.

TIMELINE

0-5s	Life vest on
5-10s	Stepping on board
10-15s	Sitting at the front
15-20s	Relaxing on board
20-25s	Back to shore

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (Life vest on): Small sandy lake shore, early morning, soft overcast daylight, flat grey water and pine trees on the far side. The owner's hands buckle a bright orange dog life vest around the dog's chest and tighten the straps. He stands patiently, fluffy chest fur poking out from under the vest. Sound: buckles clicking, small waves lapping, birds, owner says "safety first, buddy". 5-10s (Stepping on board): Lake shore, overcast morning, ankle-deep clear water. A white paddleboard floats at the edge while the owner's legs and hands hold it steady. The dog in his orange life vest sniffs the board, puts one front paw on it, then carefully climbs on and stands on the grippy pad. Sound: water lapping against the board, claws on the pad, owner says "good, easy". 10-15s (Sitting at the front): Out on the calm lake, overcast morning light, point of view from the owner standing on the paddleboard. The dog sits at the front of the board in his orange life vest, ears up, the light breeze lifting the long fur on his neck and tail. The paddle dips into the flat water beside him. Sound: paddle splashing softly, breeze, distant bird calls. 15-20s (Relaxing on board): Middle of the calm lake, soft grey daylight, pine shoreline in the distance. The dog lies down on the board in his life vest with his chin on his front paws, watching the water drift by. He leans to sniff the surface once, then settles again, very relaxed. Sound: gentle water sounds, paddle strokes, a calm sigh from the dog. 20-25s (Back to shore): Sandy lake shore, overcast morning. The board glides into shallow water and the dog in his orange life vest hops off into ankle-deep water, trots onto the sand and gives a big shake, water spraying from his long wet coat toward the camera. Sound: splash, loud shaking, owner laughing "thanks a lot".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
