Walking Through the Lavender Field

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A late afternoon walk at a lavender farm: trotting between purple rows, sniffing and sneezing, wind in his long coat, a quick sit for a photo and brushing out lavender bits.

TIMELINE

0-5s	Between purple rows
5-10s	Sniff and sneeze
10-15s	Wind in his coat
15-20s	Photo sit
20-25s	Brushing out bits

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (Between purple rows): Lavender farm, late afternoon, warm low sunlight, long rows of purple lavender bushes with dry dirt paths between them. The dog trots down one path on a long leash ahead of the camera, his fluffy sable tail bouncing above the lavender tops. Sound: soft buzzing of bees, footsteps on dry dirt, light wind. 5-10s (Sniff and sneeze): Lavender row, warm late afternoon sun, dusty path. The dog stops and pushes his nose deep into a lavender bush, sniffing hard, then pulls back and sneezes twice, shaking his head so his long ear fur flaps. He looks at the owner as if confused. Sound: sniffing, two loud sneezes, owner laughing "too strong?". 10-15s (Wind in his coat): Open lavender field, late afternoon, a breeze moving across the purple rows. The dog stands on the path facing the wind, eyes half closed, the long fur on his neck, chest and tail blowing to one side. The owner's hand reaches in and strokes his back. Sound: wind gusting, lavender rustling, owner says "look at that fluff". 15-20s (Photo sit): Lavender field path, warm late afternoon sunlight from the side. The owner says sit and the dog sits between two purple rows, ears up, panting softly, looking right at the camera. He holds it for a few seconds, then breaks and trots toward the camera. Sound: owner says "sit... stay... good!", bees humming, panting. 20-25s (Brushing out bits): Dirt parking area beside the lavender farm, late afternoon, open car hatchback behind. The owner's hand runs a slicker brush through the dog's long chest fur, pulling out small bits of dry lavender and dust. He stands still and leans into the brush. Sound: brush strokes, car door creaking, owner says "you smell amazing".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

FACEBOOK CAPTION

My car now smells like lavender and dog.
Honestly not a bad combo.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
