His First Elevator Ride

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Learning to ride an elevator: hesitating at the open doors, following a treat inside, feeling it move, stepping out quickly, and riding again like a pro.

TIMELINE

0-5s	Hesitating at doors
5-10s	Following a treat
10-15s	Feeling it move
15-20s	Quick exit
20-25s	Riding like a pro

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (Hesitating at doors): Apartment building lobby, bright overhead lights, grey tile floor. The steel elevator doors slide open and the dog, on a short leash, stops right at the edge, sniffing the metal threshold, ears back a little, unsure about the gap. He looks back at the owner and lifts one front paw, hesitating. Sound: elevator ding, doors sliding, owner says "it's okay". 5-10s (Following a treat): Elevator doorway in the apartment lobby, ordinary overhead lights. The owner steps inside and holds a small treat low. The dog stretches his neck, sniffs, then hops over the threshold into the elevator and takes the treat, tail starting to wag. Sound: claws on metal, treat crunch, owner says "yes, good boy". 10-15s (Feeling it move): Inside a small elevator with matte grey brushed metal walls and a ceiling light. The dog sits on a short leash by the owner's legs. As the elevator starts moving he shifts his feet, ears turning, and looks up at the owner with wide eyes. Sound: low mechanical hum, soft whoosh, owner whispers "almost there". 15-20s (Quick exit): Upstairs apartment hallway with beige carpet and warm ceiling lights. The elevator doors open and the dog steps out quickly onto the carpet on his leash, shaking his fluffy coat once and sniffing the hallway floor. He looks back at the elevator once, then trots toward the owner's door, tail up. Sound: ding, doors opening, a full-body shake, owner laughing. 20-25s (Riding like a pro): Apartment lobby later in the evening, overhead lights, grey tile floor. The elevator doors open and this time the dog walks straight in on his leash, turns around and sits facing the doors, looking up at the camera as if bored. Sound: ding, doors closing, owner says "look at you, a pro now".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
