15-20s	Drop it
20-25s	Cooling down

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (Waiting politely): Backyard, early evening, soft fading daylight, flat green lawn, wooden fence. The owner holds a flirt pole with a fleece lure lying on the grass. The dog sits in front, eyes locked on the lure, body quivering, ears up. The long fur on his chest moves as he breathes fast with excitement. Sound: owner says "wait", birds, the dog's excited whine. 5-10s (Chasing the lure): Same backyard, early evening light, flat lawn. The owner says okay and drags the fleece lure in a low wide circle across the grass. The dog chases it, turning with the lure, fluffy tail swinging and long coat bouncing. He stays on all four feet the whole time, keeping close to the ground. Sound: pole swishing, paws thudding, owner says "okay!". 10-15s (The catch): Backyard lawn, early evening, soft daylight. The dog pounces and catches the fleece lure in his mouth, then tugs gently backward against the pole, tail wagging, while the owner holds it steady. After a few seconds he lies down on the grass with the lure still in his mouth, chewing the fleece softly and looking up at the camera. Sound: happy growl, fleece stretching, owner laughing. 15-20s (Drop it): Backyard, early evening light, lawn. The owner says drop it and the dog lets go of the lure right away and sits, staring at it again, panting, waiting for the next round. The lure lies still on the grass in front of him while the owner's hand gives him a small treat and a quick scratch on the chest. Sound: owner says "drop it... good", heavy panting, crickets starting. 20-25s (Cooling down): Back patio by the door, dusk, porch light just turned on. The dog drinks from a steel water bowl, water dripping from his chin, then lies down on the cool patio stones with his tongue out and his fluffy tail stretched behind him. Sound: loud lapping, crickets, a tired sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
