Puppy's First Toy

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

He meets his very first toy, a soft plush hedgehog: a careful sniff, a pounce, a surprise squeak, carrying it around and a nap with his chin on it.

TIMELINE

0-5s	Careful sniff
5-10s	First pounce
10-15s	Surprise squeak
15-20s	Carrying it proudly
20-25s	Nap with his toy

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male long-coat German Shepherd puppy, sable grey-brown fluffy fur with dark tips, oversized paws and floppy fuzzy ears, wearing a small navy blue collar. 0-5s (Careful sniff): Living room with light laminate floor and a beige rug, afternoon window light. The owner's hand sets a small soft brown plush hedgehog on the rug. The puppy creeps forward on his big paws, stretches his neck to sniff it, then hops back a step with his floppy ears bouncing. Sound: quiet room, sniffing, owner whispers "it's yours". 5-10s (First pounce): Same living room, beige rug, soft afternoon daylight. The puppy lowers his front end, wiggles his back end and pounces on the plush hedgehog with both front paws, then grabs its ear in his tiny teeth and shakes his head clumsily, almost tipping over onto his side. Sound: tiny growl, paws thumping on the rug, owner laughs. 10-15s (Surprise squeak): Living room rug, afternoon window light. The puppy bites down on the hedgehog's belly and it squeaks loudly. He drops it instantly, jumps back, stares at it and tilts his fuzzy head to one side, then slowly reaches out a paw and pats it. Sound: loud squeak, startled little yip, owner giggling. 15-20s (Carrying it proudly): Living room laminate floor, afternoon light. The puppy carries the plush hedgehog in his mouth across the room, head held high, the toy almost as big as his face. He trips over it with his oversized paws, rolls once, picks it up again and keeps going. Sound: claws clicking on laminate, muffled squeak, owner says "so proud". 20-25s (Nap with his toy): Corner of the living room, soft late afternoon daylight, a round grey puppy bed. The puppy lies curled in the bed with his chin resting on the plush hedgehog, eyes slowly closing, one oversized paw draped over the toy as his fluffy sides rise and fall. Sound: quiet room, soft puppy breathing, a tiny sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Careful sniff

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
