Puppy Meets the Big Dog Next Door

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The puppy meets the neighbor's calm old Labrador: spotting him through the fence, a nose sniff through the gap, a gentle supervised hello, a play bow and a tired rest afterward.

TIMELINE

0-5s	Spotting the fence
5-10s	Nose to nose
10-15s	Gentle hello
15-20s	Little play bow
20-25s	All tired out

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male long-coat German Shepherd puppy, sable grey-brown fluffy fur with dark tips, oversized paws and floppy fuzzy ears, wearing a small navy blue collar. 0-5s (Spotting the fence): Small backyard on a cool cloudy morning, damp green grass and a white wooden picket fence with gaps between the boards. The puppy is sniffing the lawn when a big yellow Labrador's nose appears in a gap on the other side. The puppy freezes, ears up as high as they go, and lets out one tiny woof. Sound: birds, tiny woof, owner laughs "that's the neighbor". 5-10s (Nose to nose): Same picket fence in the backyard, cloudy daylight. The puppy creeps toward the gap on his big paws and stretches his neck out. The Labrador's nose and the puppy's tiny nose touch through the gap between the boards, and the puppy's little fluffy tail starts wagging fast. Sound: snuffling, gentle sniffs, owner whispers "easy". 10-15s (Gentle hello): Our backyard lawn, overcast daylight. The neighbor's legs in jeans stand nearby holding a loose leash, and the calm yellow Labrador lies down on the grass. The puppy walks up slowly, sniffs the big dog's ear and cheek, and the Labrador stays relaxed with his chin on his paws. Sound: soft sniffing, neighbor says "good boy, gentle". 15-20s (Little play bow): Backyard lawn, flat cloudy light, wooden fence behind. The puppy drops into a play bow in front of the lying Labrador, his fluffy back end up and tail wagging, then hops sideways. The big dog lifts his head, sniffs the puppy gently and thumps his tail on the grass once. Sound: tiny yip, tail thumping on grass, owners chuckling. 20-25s (All tired out): Backyard grass, overcast late morning. The puppy lies flat on his belly next to the owner's sneakers, back legs stretched out behind him, panting with a tiny pink tongue. In the background the neighbor walks the Labrador back toward the gate on a loose leash. Sound: little panting, gate latch clicking, owner says "you made a friend".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Spotting the fence

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
