Growing Into His Big Paws

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Five months old, all legs and paws: a paw size check, tripping up the porch steps, a lanky gallop, a paw in the water bowl and a big sprawl on the rug.

TIMELINE

0-5s	Paw size check
5-10s	Tripping up the steps
10-15s	Lanky gallop
15-20s	Paw in the bowl
20-25s	Big sprawl

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 5-month-old male long-coat German Shepherd, lanky with long legs and big fluffy ears, one ear still slightly floppy, sable grey-brown coat that is growing longer, wearing a navy blue nylon collar. 0-5s (Paw size check): Kitchen with beige tile floor, morning daylight from a window. The dog lies on the floor and the owner's hand rests flat next to his front paw for comparison. His paw is almost as wide as the owner's palm. He sniffs the hand, then licks it, his one floppy ear tipping over. Sound: fridge hum, owner says "look at the size of these". 5-10s (Tripping up the steps): Wooden back porch steps, overcast late morning, a doormat at the top. The dog bounds up the three steps toward the camera, his big front paws landing clumsily, one paw missing a step. He catches himself, scrambles to the top and shakes his head, ears flapping. Sound: paws thumping on wood, owner laughs "careful". 10-15s (Lanky gallop): Backyard with uneven grass and a wooden fence, cloudy daylight. The dog gallops across the lawn in a loose, gangly run, long legs going in every direction, big paws thumping, his floppy ear bouncing with each stride as he circles back toward the owner. Sound: paws on grass, panting, birds, owner calling his name. 15-20s (Paw in the bowl): Kitchen corner, beige tiles, daylight through the window. The dog walks up to his steel water bowl to drink and plants one big front paw right in it, splashing water across the floor. He looks down at the wet paw, then keeps drinking anyway. Sound: splash, loud lapping, owner groans "every time". 20-25s (Big sprawl): Living room with a cream rug, soft afternoon window light. The dog flops onto his side on the rug, long legs stretched out straight, big fluffy paws dangling. He lifts his head to look at the camera, one ear up and one ear folded over, then drops his head back down. Sound: soft flop, a big puppy sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Paw size check

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

His paws arrived about six months before the rest of him.
Was your pup all paws at this age too?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
