Puppy's First Snow

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A short first visit to a light snowfall: looking out the back door, first high-stepping paws, snapping at a flake, a snowy nose dive and a warm towel rub back inside.

TIMELINE

0-5s	Looking out the door
5-10s	First high steps
10-15s	Snapping at flakes
15-20s	Snowy nose dive
20-25s	Warm towel rub

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real 9-week-old male long-coat German Shepherd puppy, sable grey-brown fluffy fur with dark tips, oversized paws and floppy fuzzy ears, wearing a small navy blue collar. 0-5s (Looking out the door): Open back door in the morning, flat white daylight, a thin layer of fresh snow on the wooden deck outside. The puppy stands on the doormat inside, stretches his neck out and sniffs the cold air, his fuzzy ears flopping forward, not sure about stepping out. Sound: quiet outside, sniffing, owner says "it's snow, buddy". 5-10s (First high steps): Snowy wooden deck, light snow falling, soft grey morning daylight. The puppy steps out onto the snow and lifts each oversized paw high with every step, then stops and shakes one front paw. Small paw prints trail behind him on the white boards. The owner's boots stand still just behind him. Sound: soft snow crunch, owner giggles. 10-15s (Snapping at flakes): Edge of the deck, gentle snowfall, overcast daylight, a snowy garden behind. The puppy watches the falling flakes, then snaps his little jaws at one, misses, tries again and ends up with a few flakes resting on his nose and dark-tipped fur. His fuzzy tail wiggles the whole time. Sound: tiny jaw clicks, soft snowfall, owner laughing. 15-20s (Snowy nose dive): Small backyard lawn with a thin layer of snow, grey daylight. The puppy pushes his nose into a little drift by the steps, then pops his head up with a white snowy face and blinks, snow stuck in his fuzzy whiskers, his tail wagging fast. Sound: a tiny sneeze, owner says "okay, that's enough, come inside". 20-25s (Warm towel rub): Kitchen doormat inside the back door, warm ceiling light, beige tile floor. The owner's hands rub the puppy gently with a soft blue towel. His damp fluffy fur sticks up in tufts, and he grabs the corner of the towel in his tiny teeth and tugs. Sound: towel rubbing, tiny growl, heater humming.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Looking out the door

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
