Confused by the Robot Vacuum

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Not scared, just deeply confused. The new robot vacuum leaves its dock, he follows it, it bumps his paw, he tilts his head and finally lets it pass by.

TIMELINE

0-5s	It moves by itself
5-10s	Following it
10-15s	It bumps him
15-20s	Head tilts
20-25s	Letting it pass

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. 0-5s (It moves by itself): Living room with a light wooden floor, mid-morning daylight from the window. A round black robot vacuum rolls slowly out of its dock by the wall. The dog, lying on a grey rug, lifts his head, ears straight up, and watches it without blinking. Sound: robot vacuum whirring, a short beep. 5-10s (Following it): Same living room, daylight, wooden floor. The dog gets up and follows the robot vacuum at a careful distance, head low and nose stretched toward it, his fluffy tail held level as the vacuum turns along the edge of the couch. He stops each time it stops. Sound: steady whirring, claws clicking on the floor. 10-15s (It bumps him): Living room floor near the coffee table, morning light. The robot vacuum rolls straight into the dog's front paw and stops. He hops back with a surprised huff, stares at it, then gives it one quick sniff as it backs up and changes direction. Sound: soft bump, surprised huff, owner laughing. 15-20s (Head tilts): Living room, daylight from the window, wooden floor. The dog stands still watching the robot vacuum spin in place, tilting his head to the left, then to the right, his long fluffy ears twitching at every beep. His front paws shift a little as he leans closer, unsure what to do. Sound: beeping, whirring, owner says "what is it, huh?". 20-25s (Letting it pass): Living room, soft mid-morning light, grey rug. The dog lies back down on the rug, chin on his paws, and only his eyes follow the robot vacuum as it rolls past right in front of his nose. He lets out a long sigh but does not move. Sound: whirring fading away, a long sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | It moves by itself

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male long-coat German Shepherd with a sable coat of grey-brown fur with black tips, a darker back, fluffy longer fur on the ears, neck, chest and tail, upright ears, wearing a navy blue nylon collar with a small silver tag, natural fluffy coat that is not perfectly groomed. Living room with a light wooden floor, mid-morning daylight from the window. A round black robot vacuum rolls slowly out of its dock by the wall. The dog, lying on a grey rug, lifts his head, ears straight up, and watches it without blinking. Sound: robot vacuum whirring, a short beep.

Clip 2 | 5-10s | Following it

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
