Car Ride With My German Shepherd

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A short drive to the woods, filmed from the passenger seat: jumping into the back seat, looking out the window, nose out in the breeze, dozing off, and hopping out on arrival.

TIMELINE

0-5s	Jumping in
5-10s	Window watching
10-15s	Nose in the breeze
15-20s	Dozing off
20-25s	Arriving at the woods

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Jumping in): Home driveway, early afternoon, partly cloudy daylight, a dusty silver SUV with the rear door open and an old plaid blanket on the back seat. The dog trots up, jumps into the back seat in one hop, turns around once, and sits facing the camera, tail thumping the seat. Sound: tags jingling, car door creaking, owner says "ready?". 5-10s (Window watching): Inside the SUV, filmed from the front passenger seat turned back while someone else drives, daylight coming through the windows. The dog sits on the plaid blanket looking out the side window, head turning to follow houses and trees passing by, ears moving. Sound: engine hum, road noise, blinker clicking. 10-15s (Nose in the breeze): Same back seat, quiet country road, daylight, the rear window lowered only partway. The dog pushes its nose and the front of its face into the gap, eyes half closed, ears and cheeks fluttering in the breeze, nostrils working hard at all the smells. Sound: wind rushing, road noise, owner laughing softly. 15-20s (Dozing off): Same back seat, window closed, daylight flickering through roadside trees. The dog lies down across the plaid blanket with its head resting on the seat, eyes slowly closing, one ear twitching as the car gently bumps along. The plaid blanket is bunched up under its chest and a few loose hairs float in the light. Sound: steady engine hum, quiet radio talk, a long sigh. 20-25s (Arriving at the woods): Gravel parking area at the edge of a forest, partly cloudy afternoon light. The rear door opens and the dog hops out onto the gravel, gives a quick shake, then puts its nose to the ground and sniffs in every direction, tail wagging hard. Sound: gravel crunching, birds, car door closing, owner says "we're here".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Jumping in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Home driveway, early afternoon, partly cloudy daylight, a dusty silver SUV with the rear door open and an old plaid blanket on the back seat. The dog trots up, jumps into the back seat in one hop, turns around once, and sits facing the camera, tail thumping the seat. Sound: tags jingling, car door creaking, owner says "ready?".

Clip 2 | 5-10s | Window watching

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
