He Stole My Bed

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Bedtime battle: the dog jumps on the bed first, takes the pillow, ignores the owner, wriggles under the covers and leaves the owner a tiny corner.

TIMELINE

0-5s	Jumps on first
5-10s	Takes the pillow
10-15s	Ignores the owner
15-20s	Under the covers
20-25s	Tiny corner left

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Jumps on first): Bedroom at night, a single bedside lamp on, white sheets and a grey comforter, a phone charger on the nightstand. The owner walks in and the dog leaps onto the bed ahead of them, turns in a circle and lies down right in the middle. Sound: bed springs bouncing, owner says "oh no you don't". 5-10s (Takes the pillow): Same bedroom at night, warm bedside lamp light, white pillowcases. The dog rests its head right on the owner's pillow, sinking into it, and looks at the camera with sleepy half-closed eyes, clearly not planning to move, its tail thumping once on the comforter. Sound: a soft sigh, owner laughs "that's my pillow". 10-15s (Ignores the owner): Same bed, warm lamp light, a round dog bed on the floor beside it. The owner's hand pats the side of the mattress and then points to the dog bed. The dog flicks one ear, then turns its head away and stays exactly where it is. Sound: owner says "your bed is right there", silence, a huff. 15-20s (Under the covers): Bedroom at night, lamp light, rumpled grey comforter. The dog wriggles under the edge of the comforter until only its head sticks out on the pillow, ears up, then lets its chin drop down and gives a slow blink at the camera. Sound: fabric rustling, a contented groan. 20-25s (Tiny corner left): Same bedroom, lamp turned low, the room mostly dark. Camera points down from the owner's spot at the very edge of the mattress. The dog is stretched diagonally across the whole bed under the comforter, snoring softly, paws twitching in a dream. Sound: soft snoring, owner whispers "goodnight, I guess".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Jumps on first

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Bedroom at night, a single bedside lamp on, white sheets and a grey comforter, a phone charger on the nightstand. The owner walks in and the dog leaps onto the bed ahead of them, turns in a circle and lies down right in the middle. Sound: bed springs bouncing, owner says "oh no you don't".

Clip 2 | 5-10s | Takes the pillow

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
