Watching TV With Me

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Evening TV time together: settling onto the couch, a head tilt at animal sounds from the show, chewing his own snack, running to the door when the TV doorbell rings and falling asleep on the owner's lap.

TIMELINE

0-5s	Couch settle
5-10s	Head tilt
10-15s	Chewing his snack
15-20s	TV doorbell
20-25s	Lap nap

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Couch settle): Living room at night, ordinary warm lamp light from a floor lamp, a grey sectional couch with a throw blanket. The TV is off camera, only its flickering light shows on the wall. The dog climbs onto the couch beside the owner, turns around once and lies down pressed against the owner's leg. Sound: couch cushions creaking, a TV show playing quietly, a soft grunt. 5-10s (Head tilt): Same living room at night, lamp light and flickering TV light on the dog's face. Camera faces the dog from beside the TV, the screen is not visible. A dog barks on the show. The dog lifts its head, ears forward, and tilts its head to one side, then to the other, staring at the TV. Sound: a dog barking on the TV, owner laughing "that's not a real dog". 10-15s (Chewing his snack): Living room at night, warm lamp light, a wooden coffee table with a bowl of chips pushed far out of reach. The dog lies on the rug in front of the couch holding a thick brown chew stick between its front paws and gnaws on it, glancing up at the TV now and then. Sound: gnawing, the TV playing, owner crunching chips. 15-20s (TV doorbell): Living room at night, lamp light, a short hallway leading to the front door with shoes on a mat. A doorbell rings on the TV show. The dog jumps off the couch, runs to the front door and stands there sniffing the gap under the door with a low woof, then looks back confused. Sound: TV doorbell, claws scrambling on wood, a single woof, owner laughing. 20-25s (Lap nap): Back on the couch at night, dim lamp light, flickering TV light on the wall. The dog lies stretched along the couch with its heavy head resting on the owner's lap. The owner's hand slowly strokes its ear. The dog's eyes droop and close and its breathing gets deep and steady. Sound: TV voices quietly, soft snoring, owner whispering "one more episode".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Couch settle

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Living room at night, ordinary warm lamp light from a floor lamp, a grey sectional couch with a throw blanket. The TV is off camera, only its flickering light shows on the wall. The dog climbs onto the couch beside the owner, turns around once and lies down pressed against the owner's leg. Sound: couch cushions creaking, a TV show playing quietly, a soft grunt.

Clip 2 | 5-10s | Head tilt

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
