Crossing the River on Our Hike

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A hike that reaches a shallow, calm river: arriving at the bank, testing the water with a paw, wading across beside the owner, sniffing the pebbles on the far side and trotting on, dripping.

TIMELINE

0-5s	Reaching the bank
5-10s	Testing the water
10-15s	Wading across
15-20s	Pebble bank sniff
20-25s	Back on the trail

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Reaching the bank): Forest hiking trail opening onto a river bank, late morning, bright sunny daylight with some shade from trees, grey pebbles and roots underfoot. The dog trots ahead down the dirt path toward the wide, shallow, calm river, stops at the edge of the pebbles and looks back at the owner, tail wagging. Sound: gentle water running, birds, footsteps on gravel, panting. 5-10s (Testing the water): Edge of the shallow river, sunny late morning, clear calm water over smooth stones, only a few centimeters deep at the edge. The dog lowers its nose to sniff the water, then carefully lifts one front paw and puts it into the water, pulls it back, then steps in with both front paws. Sound: soft trickle of water, a small splash, owner says "it's okay, come on". 10-15s (Wading across): Middle of the shallow calm river, sunny daylight, clear water barely reaching the dog's ankles, stones visible on the bottom, trees on the far bank. The dog wades steadily across right beside the owner's hiking boots, on a loose leash, lifting its paws high with each step and splashing a little. Sound: boots and paws splashing, gentle flowing water, owner says "good job". 15-20s (Pebble bank sniff): Far side of the river, sunny late morning, a wide pebble bank with a few pieces of pale driftwood and tufts of grass. The dog steps out of the water dripping and starts sniffing the warm pebbles and a piece of driftwood, tail wagging, legs and belly wet and dark. Sound: water dripping, pebbles crunching, sniffing, river in the background. 20-25s (Back on the trail): Dirt hiking trail leading up from the river into the trees, sunny daylight with patches of shade, ferns along the path. The dog trots up the trail ahead of the owner with wet legs leaving damp paw prints in the dust, stops for a quick shake, then keeps going, glancing back. Sound: tags rattling during the shake, footsteps, birds, owner laughing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Reaching the bank

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Forest hiking trail opening onto a river bank, late morning, bright sunny daylight with some shade from trees, grey pebbles and roots underfoot. The dog trots ahead down the dirt path toward the wide, shallow, calm river, stops at the edge of the pebbles and looks back at the owner, tail wagging. Sound: gentle water running, birds, footsteps on gravel, panting.

Clip 2 | 5-10s | Testing the water

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
