First Time Seeing Ducks at the Pond

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

His first time seeing ducks: walking to the pond, spotting them and freezing, tilting his head at the quacking, calmly following the owner's 'leave it' and watching from the grass.

TIMELINE

0-5s	Path to the pond
5-10s	The freeze
10-15s	Head tilt
15-20s	Leave it
20-25s	Pond watching

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Path to the pond): Paved path in a city park, morning, soft overcast daylight, green grass on both sides and a small pond ahead with reeds along the edge. The dog walks on leash beside the owner, sniffing the grass at the edge of the path, tail relaxed, not yet noticing the water. Sound: birds, distant traffic, footsteps, tags jingling. 5-10s (The freeze): Grassy bank near the pond, overcast morning, calm grey water with a few ducks floating near the reeds. The dog suddenly stops, body still, ears up and pointed forward, staring at the ducks, one front paw lifted off the grass, tail held straight out. Sound: ducks quacking softly, owner whispering "oh, you see them?". 10-15s (Head tilt): Same pond bank, overcast daylight, the ducks a few meters away on the water. One duck quacks loudly, and the dog tilts its head to one side, then the other, ears moving, still watching closely while sitting beside the owner's legs on the grass. Sound: loud quacking, owner laughing quietly, leash rustling. 15-20s (Leave it): Edge of the pond, overcast morning, reeds and muddy bank, ducks paddling away across the calm water. The dog takes a few eager steps toward the water, the leash tightens gently, the owner says leave it, and the dog stops, looks back at the camera and sits. Sound: ducks paddling, owner says "leave it... good boy". 20-25s (Pond watching): Grassy slope above the pond, overcast morning, a wooden bench nearby, ducks floating far out on the water. The dog lies on the grass calmly, front paws stretched forward, watching the ducks with its ears up, tail resting on the grass. Sound: faint quacking, birds, the dog's calm breathing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Path to the pond

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
