Winter Forest Walk

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

A quiet walk through a snowy forest: trotting the white path, nose deep in the snow, snow dropping from a branch onto him, walking beside the owner and paw cleaning at the car.

TIMELINE

0-5s	Snowy path
5-10s	Nose in the snow
10-15s	Branch snow drop
15-20s	Side by side
20-25s	Paw cleaning

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Snowy path): Pine forest in winter, late morning, flat grey overcast light, a narrow path of packed snow between tall dark trees, branches heavy with snow. The dog trots along the path ahead of the camera, paws sinking slightly, little clumps of snow flying up behind it. Sound: crunching snow, quiet forest, tags jingling, owner's breathing. 5-10s (Nose in the snow): Beside the snowy forest path, overcast winter light, deep untouched snow around the base of a pine tree. The dog shoves its whole muzzle into the snow, sniffs deeply, then pulls its head out with snow covering its nose and eyebrows and sneezes. Sound: snuffling, a sneeze, owner laughing "snow face". 10-15s (Branch snow drop): Under a low pine branch on the forest path, overcast winter daylight. A clump of snow slides off the branch and lands on the dog's back, the dog jumps a little, looks up at the branch, then shakes hard, sending snow flying. Sound: soft thump of snow, tags rattling, owner says "surprise!". 15-20s (Side by side): Snowy forest path, cold overcast afternoon, grey light, the owner's black winter boots crunching in the snow. The dog walks right beside the boots at the same pace, its breath visible in the cold air, looking up at the camera now and then with snow on its chin. Sound: boots and paws crunching, quiet wind, distant crow. 20-25s (Paw cleaning): Snowy forest parking area, cold afternoon, grey daylight, the open back of a dark SUV with an old towel on the floor. The dog stands while the owner's gloved hands lift one front paw and brush little snowballs from between its toes, then the next paw. Sound: towel rubbing, owner saying "other paw", the dog's soft huff.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Snowy path

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
