Catching Snowballs

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Backyard snowball catching: waiting in a crouch, a snowball that disappears in his mouth, digging to find it, one high catch and a snowy muzzle close-up.

TIMELINE

0-5s	Ready crouch
5-10s	Where did it go
10-15s	Snow digging
15-20s	High catch
20-25s	Snowy muzzle

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Ready crouch): Snowy backyard, midday, bright overcast winter light, wooden fence covered in snow, a snow-topped picnic table. The owner's gloved hands pack a snowball in front of the camera while the dog stands a few meters away in the snow, front end lowered, tail wagging, staring at the snowball. Sound: snow crunching, owner saying "ready? ready?", excited whine. 5-10s (Where did it go): Same snowy backyard, overcast daylight. The owner tosses the snowball, the dog jumps and snaps it out of the air, the snowball breaks apart in its mouth, and the dog lands and looks around on the ground confused, snow crumbs on its lips. Sound: snap of jaws, owner laughing hard "where did it go?". 10-15s (Snow digging): Backyard in winter, overcast light, deep fresh snow near the fence. The dog digs quickly at the spot where the snowball fell, front paws throwing snow behind it, then pushes its nose into the hole and sniffs, searching for the missing snowball. Sound: fast digging, snuffling, owner says "it's gone, buddy". 15-20s (High catch): Snowy backyard, bright overcast daylight, snow-covered bushes along the fence. The owner throws another snowball a little higher, the dog leaps up and catches it, snow bursting around its face, then lands in the deep snow and shakes its head hard, sending snow everywhere. Sound: snowball crunch, owner cheering "nice catch!", tags rattling. 20-25s (Snowy muzzle): Backyard in the snow, overcast winter light. Close view as the dog lies in the snow chewing a chunk of snow, its muzzle and whiskers covered in white, breath visible, then looks right at the camera and licks its nose. Sound: crunching snow, heavy breathing, owner says "one more?".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Ready crouch

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Snowy backyard, midday, bright overcast winter light, wooden fence covered in snow, a snow-topped picnic table. The owner's gloved hands pack a snowball in front of the camera while the dog stands a few meters away in the snow, front end lowered, tail wagging, staring at the snowball. Sound: snow crunching, owner saying "ready? ready?", excited whine.

Clip 2 | 5-10s | Where did it go

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
