Pretending He Didn't Hear "Bath"

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The owner says the word bath and the dog suddenly goes deaf: ignoring the call, looking away from the towel, hiding behind the bed, planting his paws at the bathroom door and sulking in the tub.

TIMELINE

0-5s	Selective hearing
5-10s	Looking away
10-15s	Hiding spot
15-20s	Brakes on
20-25s	Wet and sulking

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Selective hearing): Living room, mid-afternoon, plain window daylight, grey couch and a faded blue rug. The dog lies stretched out on the rug with eyes closed. The owner says the word bath off camera. One ear flicks toward the voice, but the dog keeps his eyes shut and does not move at all, breathing slowly. Sound: quiet room, owner says "bath time, buddy", a long innocent sigh from the dog. 5-10s (Looking away): Narrow hallway with beige walls and shoes by the wall, natural light from a side window. The owner's hand holds up a folded blue bath towel near the dog. The dog sitting on the floor slowly turns his head away from the towel and stares at the wall, ears pulled slightly back. Sound: owner laughing, "I know you can hear me", tags jingling softly. 10-15s (Hiding spot): Bedroom, afternoon, overcast light through thin curtains, unmade bed with a grey comforter. The camera peeks around the end of the bed. The dog is lying flat on the carpet in the narrow gap between the bed and the wall, chin on the floor, only his ears and eyes visible, very still. Sound: owner whispering "found you", the dog's tail thumping once on the carpet. 15-20s (Brakes on): Bathroom doorway, white tile floor, ordinary ceiling light on. The owner's hand holds the dog's collar gently and encourages him forward. The dog leans his weight back with front paws planted on the tile, refusing to step in, then takes one slow reluctant step through the doorway. Sound: claws sliding a little on tile, owner saying "come on, it's just water". 20-25s (Wet and sulking): Same bathroom, ceiling light on. The dog stands in a white bathtub with his coat soaked and flat, water dripping from his belly, head held low and ears back. He looks sideways at the camera without moving, then gives a huge full-body shake that splashes water onto the wall and the camera. Sound: water dripping, a loud shake, owner yelling "no no no" and laughing.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

FACEBOOK CAPTION

He hears a chip bag open from three rooms away.
But the word bath? Never heard of it.

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
