Refusing to Leave the Park

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Time to go home and the dog has other plans: lying down when the leash comes out, staying put, rolling in the grass, ignoring the treat bag and finally giving in.

TIMELINE

0-5s	Leash goes on
5-10s	Not moving
10-15s	Grass roll
15-20s	Treat bag test
20-25s	Giving in

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (Leash goes on): Big open city park, late afternoon, cloudy daylight, wide mowed grass and trees in the distance. The owner's hand clips a red leash onto the dog's collar. The instant it clicks, the dog lies down flat in the grass and puts his chin on his paws. Sound: leash clip clicking, distant kids playing, owner saying "time to go". 5-10s (Not moving): Same park, late afternoon, overcast light. The owner walks a few steps away with the leash going slack. The dog stays lying in the grass, only his eyes following the owner, his body completely still, ears turned back. A few trees sway in the background and a jogger passes far away. Sound: owner sighing "come on, buddy", wind in the trees. 10-15s (Grass roll): Park lawn, late afternoon, grey sky, a park bench in the background. The dog rolls onto his back in the grass and wiggles from side to side with his legs in the air, grunting happily, completely ignoring the owner standing over him with the leash. Sound: happy grunts, grass rustling, owner laughing "you're kidding me". 15-20s (Treat bag test): Same park, fading afternoon light. The owner shakes a small crinkly treat bag. The dog's head pops up, he looks at the bag for a second, then lies back down in the grass and lets out a long sigh. He rests his chin back on his front paws. Sound: treat bag crinkling, a long dog sigh, owner groaning. 20-25s (Giving in): Park path near the parking area, dusk, cloudy sky, trees and a paved walkway. The dog finally walks beside the owner on the leash, slowly, turning his head to look back at the open field twice as they walk toward the car. Sound: footsteps on pavement, tags jingling, owner saying "finally".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Leash goes on

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Big open city park, late afternoon, cloudy daylight, wide mowed grass and trees in the distance. The owner's hand clips a red leash onto the dog's collar. The instant it clicks, the dog lies down flat in the grass and puts his chin on his paws. Sound: leash clip clicking, distant kids playing, owner saying "time to go".

Clip 2 | 5-10s | Not moving

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. Same park, late afternoon, overcast light. The owner walks a few steps away with the leash going slack. The dog stays lying in the grass, only his eyes following the owner, his body completely still, ears turned back. A few trees sway in the background and a jogger passes far away. Sound: owner sighing "come on, buddy", wind in the trees.

Clip 3 | 10-15s | Grass roll

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
