Adoption Day - Bringing Him Home From the Shelter

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The day we adopted him: meeting at the shelter, hopping into the car, his first car ride with us, stepping into his new home and finally relaxing on his new bed.

TIMELINE

0-5s	First meeting
5-10s	Into the car
10-15s	First car ride
15-20s	New home sniff
20-25s	New bed

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult male German Shepherd with a black saddle, tan legs and tan face, slightly darker muzzle, upright ears, wearing a worn brown leather collar with a small metal tag, natural slightly messy coat with a little loose fur on the shoulders. 0-5s (First meeting): Fenced outdoor meeting yard at an animal shelter, overcast morning, plain gravel and a chain-link fence. A shelter worker, seen from the waist down, walks the dog out on a slip leash. The dog approaches slowly with his tail low and sniffs the owner's outstretched hand. Sound: distant barking, gravel crunching, owner whispering "hi, handsome". 5-10s (Into the car): Shelter parking lot, overcast daylight, a silver car with the back door open and a folded blanket on the seat. The dog stands next to the car, sniffs the seat, hesitates for a moment, then hops up onto the blanket. Sound: car door, owner saying "good boy, you're coming home", wind. 10-15s (First car ride): Inside the car, daytime, grey daylight through the windows, filmed from the passenger seat turned around while someone else drives. The dog sits on the back seat blanket, looking out the side window, then looks at the owner and lies down. Sound: engine hum, turn signal clicking, owner saying "almost there, buddy". 15-20s (New home sniff): Front hallway of a small house, afternoon daylight from the open front door, wooden floor and shoes by the wall. The dog steps inside slowly, sniffing the floor, the shoes and the walls, tail low but starting to wag a little. Sound: claws on wood, quiet house, owner saying "this is your home now". 20-25s (New bed): Living room in the evening, warm table lamp light, a brand new grey dog bed by the couch. The dog lies down on the bed, lets out a long deep sigh and closes his eyes while the owner's hand gently strokes the top of his head. Sound: a long sigh, quiet room, owner whispering "welcome home".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | First meeting

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
