Washing the Windows

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Window cleaning day, which is really nose print removal day: her smudges, the owner wiping while she waits on her mat, the outside pane, a bird on the porch rail, and a brand new nose print.

TIMELINE

0-5s	Nose print evidence
5-10s	Wiping the glass
10-15s	Outside pane
15-20s	Bird on the rail
20-25s	Fresh nose print

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female solid black German Shepherd with a fully black short coat that looks slightly dusty brown-black on the legs in daylight, amber-brown eyes, upright ears, athletic build, wearing a green nylon collar with a small brass tag, natural coat with a little shedding. 0-5s (Nose print evidence): Living room, overcast morning, grey daylight through a large window. The camera shows a row of smudgy nose prints on the lower part of the glass at exactly dog height. The dog walks into frame and presses her nose to the glass again, adding one more print. Sound: quiet room, sniffing, owner laughing "there it is". 5-10s (Wiping the glass): Same living room, flat overcast light, laminate floor. The owner sprays the glass and wipes it with a blue cloth in circles. The dog lies on a mat by the sofa across the room, away from the spray bottle, her head up and her eyes following the cloth back and forth. Sound: spray bottle clicks, cloth squeaking on glass. 10-15s (Outside pane): Front yard, cool overcast morning, damp grass and a small flower bed under the window. The owner wipes the outside of the window with a squeegee on a short pole. The dog lies on the lawn a few steps back from the bucket, chewing a rope toy and glancing up each time the squeegee squeaks. Sound: squeegee squeaks, dripping water, birds, a car passing. 15-20s (Bird on the rail): Living room, overcast daylight through the freshly cleaned window. A small brown bird lands on the porch railing outside. The dog trots to the window, stands tall with her ears forward, and huffs quietly, her nose stopping just short of the glass. Sound: faint chirping outside, a low huff, claws on laminate. 20-25s (Fresh nose print): Living room, grey late morning light. Close view of the clean window, then the dog's nose touches the glass and leaves a fresh smudge right in the middle at dog height. She looks back at the camera, tail wagging, while the owner's hand holding the blue cloth drops in defeat. Sound: owner laughing "four minutes, that's a record".

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Nose print evidence

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult female solid black German Shepherd with a fully black short coat that looks slightly dusty brown-black on the legs in daylight, amber-brown eyes, upright ears, athletic build, wearing a green nylon collar with a small brass tag, natural coat with a little shedding. Living room, overcast morning, grey daylight through a large window. The camera shows a row of smudgy nose prints on the lower part of the glass at exactly dog height. The dog walks into frame and presses her nose to the glass again, adding one more print. Sound: quiet room, sniffing, owner laughing "there it is".

Clip 2 | 5-10s | Wiping the glass

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
