Hot Pavement Paw Test

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Checking the pavement before a summer walk: the hand test on the driveway, choosing the grass instead, walking in the shade, a sprinkler cool-off and resting on cool tiles.

TIMELINE

0-5s	Hand test
5-10s	Grass route
10-15s	Shady stretch
15-20s	Sprinkler cool-off
20-25s	Cool tile rest

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female solid black German Shepherd with a fully black short coat that looks slightly dusty brown-black on the legs in daylight, amber-brown eyes, upright ears, athletic build, wearing a green nylon collar with a small brass tag, natural coat with a little shedding. 0-5s (Hand test): Sunny concrete driveway, late morning, bright summer daylight, hard shadows. The owner crouches and presses the back of a hand flat on the pale concrete, holding it there, while the dog stands beside on a leash on the cool green lawn, watching the hand. Sound: cicadas buzzing, owner says "nope, too hot". 5-10s (Grass route): Strip of lawn along the sidewalk, late morning, strong summer sunlight. The dog walks on a leash on the grass instead of the hot concrete, paws sinking into the soft lawn, while the owner's sandals step along the sidewalk edge next to her. Sound: cicadas, grass swishing, a lawn sprinkler ticking nearby. 10-15s (Shady stretch): Tree-shaded sidewalk, late morning, deep shade under large oak trees with spots of bright sun. The dog walks slowly on a loose leash in the shade, tongue out, panting lightly, and steers toward the darkest patch under a tree before sniffing the roots. Sound: soft panting, birds, leaves rustling. 15-20s (Sprinkler cool-off): Front lawn of the house, midday sun, a small oscillating sprinkler spraying arcs of water. The dog trots through the spray on a long loose leash, snapping playfully at the droplets, water darkening her coat even more and dripping from her chin. Sound: sprinkler hissing, splashing, owner laughing. 20-25s (Cool tile rest): Kitchen inside, midday, curtains half drawn, cool dim daylight, beige tile floor. The dog lies stretched out flat on the tiles beside a full water bowl, belly against the cool floor, still damp from the sprinkler, panting softly and slowly closing her eyes. Sound: air conditioner humming, slow panting, a contented sigh.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Hand test

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
