Walk After the Storm

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

The first walk after a big storm: checking the yard, sniffing a fallen branch, walking around puddles, watching neighbors sweep up and the clearing sky on the way home.

TIMELINE

0-5s	Yard check
5-10s	Fallen branch
10-15s	Puddle detour
15-20s	Neighbors cleaning
20-25s	Clearing sky

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female solid black German Shepherd with a fully black short coat that looks slightly dusty brown-black on the legs in daylight, amber-brown eyes, upright ears, athletic build, wearing a green nylon collar with a small brass tag, natural coat with a little shedding. 0-5s (Yard check): Backyard, morning after a storm, cool washed-out grey light, wet lawn scattered with twigs and leaves, a tipped-over plastic chair. The dog walks around slowly, nose down, sniffing the twigs and the fallen chair one by one, tail held level and curious. Sound: dripping gutters, birds returning, wet grass. 5-10s (Fallen branch): Neighborhood sidewalk, morning, damp overcast light, a large leafy branch lying across the grass strip. The dog on a short leash sniffs along the broken end of the branch, then steps carefully around the leaves while the owner steers her away. Sound: water dripping from trees, sniffing, owner says "wow, look at that". 10-15s (Puddle detour): Residential street, morning, grey light, a wide brown puddle covering part of the sidewalk. The owner steps onto the grass to go around and the dog follows, but dips one front paw into the edge of the puddle and shakes it off. Sound: splash, paw shaking, owner laughs "almost". 15-20s (Neighbors cleaning): Front of a neighbor's house, morning, overcast but brightening, a man raking wet leaves and branches into a pile on his driveway. The dog stops on the sidewalk on a leash and sits, watching the rake move back and forth, ears flicking. Sound: rake scraping, neighbor says "rough night", owner answers "sure was". 20-25s (Clearing sky): Quiet street near home, late morning, clouds breaking up with patches of pale blue sky, wet road shining. The dog trots on a loose leash with a lighter step, tail swinging, and lifts her nose to sniff the fresh air as the sun peeks out. Sound: birds singing, dripping slowing, footsteps.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Yard check

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
