Night Drive Home

One 25-second video | 5 clips combined | Real phone-video look | 9:16 Reel

VIDEO IDEA

Driving home after visiting family at night: walking to the car in the dark, getting buckled in, street lights passing, dozing off on the back seat and padding into the house.

TIMELINE

0-5s	Walking to the car
5-10s	Buckled in
10-15s	Street lights
15-20s	Dozing off
20-25s	Padding inside

MUSE AI PROMPT - COMBINE ALL 5 CLIPS INTO ONE 25-SECOND VIDEO (copy and paste)

Make ONE single 25-second video by combining these 5 clips in order, 5 seconds each, joined with simple hard cuts into one continuous video. Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. The dog is a real adult female solid black German Shepherd with a fully black short coat that looks slightly dusty brown-black on the legs in daylight, amber-brown eyes, upright ears, athletic build, wearing a green nylon collar with a small brass tag, natural coat with a little shedding. 0-5s (Walking to the car): Grandparents' driveway at night, dark sky, ordinary porch light and a street lamp lighting the pavement. The dog walks on a leash beside the owner's legs toward a parked sedan, sniffing the cool night air, her black coat barely visible except where the light hits. Sound: crickets, door closing behind, grandma calls "bye sweetheart". 5-10s (Buckled in): Back seat of the sedan at night, dim dome light on inside the car. The owner's hands clip the seatbelt tether to the dog's black harness while she sits on a fleece blanket, yawning wide and showing her pink tongue. Sound: seatbelt click, a big yawn, dome light clicking off. 10-15s (Street lights): Inside the moving sedan at night, filmed by a passenger in the back seat next to the dog. Orange street lights pass by outside, briefly lighting her face and ears through the side window as she sits in her harness seatbelt, blinking slowly. Sound: soft engine hum, quiet radio, tires on the road. 15-20s (Dozing off): Back seat of the moving car at night, only faint dashboard light and passing street lights. The dog lies curled on the fleece blanket, harness still clipped to the seatbelt, chin resting on the passenger's leg, eyes closing as her breathing slows. Sound: steady road noise, soft snoring, passenger whispers "she's out". 20-25s (Padding inside): Front door of home at night, porch light on, then the dim entryway with one lamp on. The dog walks in sleepily, tail low and relaxed, heads straight down the hall and steps into her bed by the couch, circling once before lying down. Sound: keys jingling, door closing, a sleepy groan.

AVOID / NEGATIVE PROMPT (paste into the negative box, or add "Avoid: ..." at the end)

cinematic, slow motion, lens flare, golden glow, dramatic lighting, studio lighting, color grading, film look, perfect shiny fur, glowing eyes, human-like facial expressions, smooth drone or gimbal movement, background music, text, subtitles, watermark, extra legs, extra tail, morphing, warped paws, plastic-looking skin or fur

CLIP-BY-CLIP PROMPTS (backup)

Use these only if Muse AI makes a video shorter than 25 seconds: make each clip separately, then join them in order. Every prompt already includes the same dog and camera wording.

Clip 1 | 0-5s | Walking to the car

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. A real adult female solid black German Shepherd with a fully black short coat that looks slightly dusty brown-black on the legs in daylight, amber-brown eyes, upright ears, athletic build, wearing a green nylon collar with a small brass tag, natural coat with a little shedding. Grandparents' driveway at night, dark sky, ordinary porch light and a street lamp lighting the pavement. The dog walks on a leash beside the owner's legs toward a parked sedan, sniffing the cool night air, her black coat barely visible except where the light hits. Sound: crickets, door closing behind, grandma calls "bye sweetheart".

Clip 2 | 5-10s | Buckled in

Shot on an iPhone held by the owner, vertical 9:16, 1x lens, handheld with small natural shakes, auto-exposure and autofocus, real-time speed with no slow motion, available natural light only, no color grading, ordinary lived-in home, normal phone video quality - looks like an unedited home video posted on Facebook. FACEBOOK CAPTION

Ten minutes into the drive home and she was snoring.
Does your dog fall asleep in the car too?

HOW TO MAKE IT LOOK REAL

Use a real photo	Biggest realism boost: use Image-to-Video and upload the same real German Shepherd photo for every clip. Same photo = same dog in all 5 clips.
Muse AI: one video	Paste the full 25-second prompt into Muse AI. It tells Muse AI to combine all 5 clips into ONE 25-second video. If the result comes out shorter, make each clip with its own prompt and join them in order (CapCut) with simple hard cuts.
Pick the most natural	Generate 2-3 versions of each clip and keep the one where the dog moves most naturally. Delete any clip with weird legs, tail or face.
Keep the real sound	Keep the natural sounds (paws, tags, panting, owner's voice). If you add a trending Facebook sound, keep it quiet underneath.
No filters	Do not add filters, slow motion or fancy transitions - real home videos don't have them.
